Things Just Got A Whole Lot Sweeter At Anderson Regional Health System's Labor & Delivery Unit

Anderson Regional Health System welcomes newborns into the world by playing lullabies over their new CyberData Paging Endpoints

Delivering miracles everyday…

Showing creativity and a desire to make newborns and their new families welcome, Anderson installed CyberData devices to play a lullaby every time a baby is born.
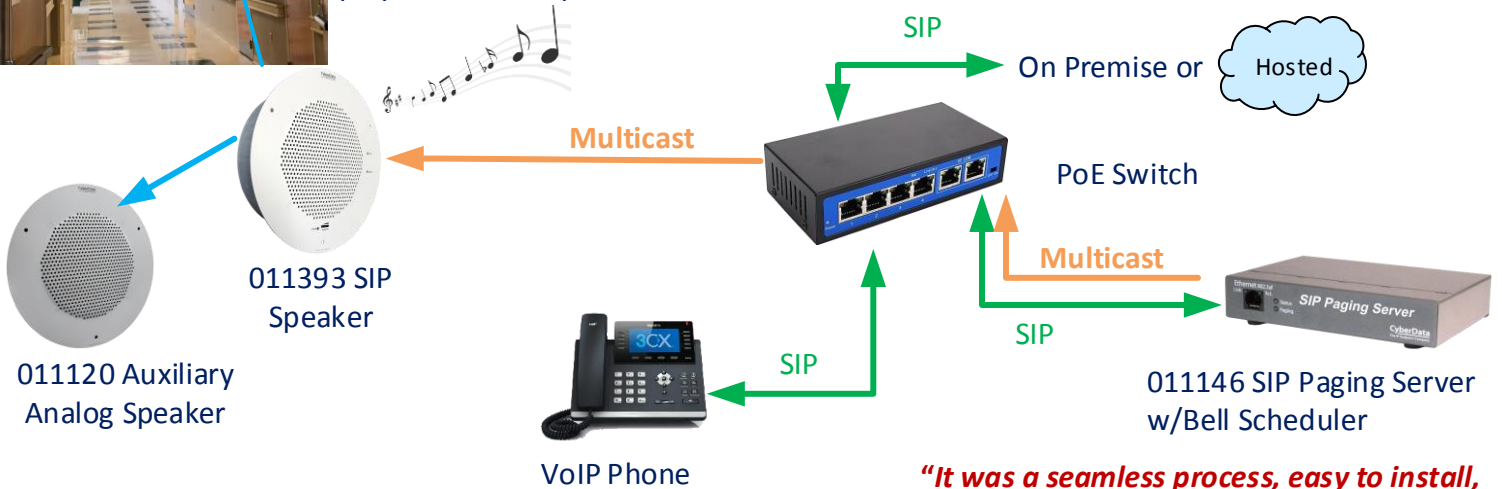

The birth of a baby is one of the most amazing events in life, and Anderson's goal is to help make that experience special and memorable from the moment soon-to-be parents arrive.

So it was with great interest when CyberData received the call from Pat Sanders in Information Technology at Anderson with this wonderful idea: Facilitate a solution to play lullabies over speakers in Labor & Delivery every time a baby is born.

What a great idea!

Using the 011146 SIP Paging Server w/Bell Scheduler, and four 011393 SIP Speakers in Labor Delivery, they were able to facilitate this great idea seamlessly. Adding an Auxiliary Analog Speaker off of a SIP Speaker is a cost-effective way to increase coverage. When a baby is born, a staff member picks up the phone, enters an extension and the lullaby is played over the speakers.

"It was a seamless process, easy to install, and the staff is really happy about hearing the lullaby play every time a baby is born."
- Pat Sanders, Information Technology, Anderson Regional Health System

Established in 1928 and located in Meridian MS, Anderson Regional Medical Center offers the compassionate care to which patients have grown accustomed. Going that extra step, and playing a sweet lullaby to welcome a newborn and also announce to the staff a baby has safely arrived into the world is an example of Anderson Regional's mission and values, and we thank them for using CyberData's endpoints in such a wonderful way.
