Fire Panel Integration Using CyberData Devices

CyberData
The IP Endpoint Company

CyberData designs SIP endpoints with integration in mind:
→ Integration with Fire Panels to provide an enhanced notification solution
→ Integration with your Hosted provider or On-Prem IP PBX server
→ Integration within your existing Analog paging system

Analog Amplifier

Analog Speakers

— **SIP**
— Multicast

Alarm Relay Output

SIP Paging Server

011146 SIP Paging Server w/Bell Scheduler

Fire Panel

Alarm relay output will trigger a stored message to be played through the paging system.
A VoIP phone or Multicast Microphone can make additional live announcements.

011393 SIP/Multicast Speaker

PoE 802.3at Switch

SIP/Multicast Phone
