

CyberData's First Release for 2019: Multicast Speaker Retails for Under \$240!

Lots of excitement to start the new year off!
CyberData is releasing the Multicast Speaker, the most cost-effective paging speaker on the market.

- Plays audio from multicast
- TLS security for autoprovisioning
- Support for 10 multicast paging groups
- Network-adjustable speaker volume

Perfect for schools/universities, SMB, or anywhere there is a need for mass communication on a tight budget!

011458 Multicast Speaker

Multiple ways to use it:

- With an IP PBX Server that supports multicast
- With a VoIP Phone that supports multicast such as Polycom
- With CyberData's SIP Paging Server w/Bell Scheduler
- With CyberData's Multicast Microphone

Typical IP Speaker Configuration
