Notes

CyberData SIP Paging Adapter's RCA line level output connects to the INPUT terminals on the Jeil JPA-120A/240A paging amplifier. If audio volume is low, disconnect the ground shield from the JPA-120A/240A terminal block.

2-conductor, shielded speaker wire is recommended.

a. The 600-Ohm audio output of the page port is also suited for interfaces with lower input impedances.

b. 1 Amp at 30 VDC for continuous loads.
