Notes

The Peavey TPM-S2 Telephone Paging Model must be set to accept 600 Ohm Page Port Audio by jumpers on its PCB (either 10K Ohm or 600 Ohm) of which the 600 Ohm is appropriate to connect the VoIP Paging Server.

You must power down all equipment prior to changing any connections.

2-conductor, shielded speaker wire is recommended.

a. The 600-Ohm audio output of the page port is also suited for interfaces with lower input impedances.

b. 1 Amp at 30 VDC for continuous loads.
