Backbox

Backbox Mounting Holes Fits 1/4" Concrete Anchor and Screw; Gound Lug Fits Size 8 Ring Terminal. (All Mounting Hardwares and Cable Assemblies are Not Provided)

Securing the Intercom

Caution

⚠ GENERAL ALERT

Equipment Hazard: Do not use an electric or power screwdriver to fasten the face plate and PCB assembly to the gang box. To prevent over-torque damage to the gasket, do not apply more than 10 inch-pounds force. Over-torquing will cause the gasket to tear, risk moisture intrusion, and effectively void the manufacturer's warranty.

Note: To mount the intercom, use methods compliant with local electrical codes.

Note: More installation and mounting information is illustrated in the Operations Guide.

Properly seal the intercom to prevent the accumulation of dust and moisture. Critical areas are shown in the image above: the conduit hole, all screw holes and an application of sealant around the perimeter.

Getting Started

- Download the *Operations Guide* PDF file, from the **Downloads** tab at the following webpage:

  https://www.cyberdata.net/products/011186

- Create a plan for the locations of your Intercoms.

- WARNING: This product should be installed by a licensed electrician according to all local electrical and building codes.

- WARNING: To prevent injury, this apparatus must be securely attached to the floor/wall in accordance with the installation instructions.

- WARNING: The PoE connector is intended for intra-building connections only and does not route to the outside plant.

- WARNING: This enclosure is not rated for any AC voltages!

- WARNING: Failure to properly seal intercom can compromise the IP rating. Should the product be exposed to water damage, it will be treated as an out of warranty scenario due to improper installation.

RTFM Button

RTFM button (SW1)

When the device is operational and linked to a network, you can use the Reset Test Function Management (RTFM) button (SW1 [see picture]) to announce the device's IP address or restore the device to the factory default settings.
To announce the device's current IP address:

- Press and release the RTFM button within a five second window.

Note   The device will use DHCP to obtain the new IP address (DHCP-assigned address or default to IPv4 Link Local if a DHCP server is not present).

To restore the device to factory default settings:

- Press and hold the RTFM button for longer than five seconds until you hear the device announce that it is restoring the factory default settings.

Side Conduit Mounting Restrictions

Backbox

Hole Plug Assembly

Locknut

Thread Depth Not to Exceed 0.4 Inch [10mm]

1/2" EMT Compression Connector with Sealing Locknut Pre-installed (Sold Separately)

1/2" EMT Conduit

Installation Steps:
1) Remove the hole plug assembly from the side of the Backbox, then use it to cover the rear conduit hole.
2) Install the EMT compression connector with presetted depth sealing locknut through the conduit hole, then fasten another locknut from the inside of the Backbox. When using third party 1/2" EMT compression connector,
✱ Make sure the threads do not protrude out more than 0.4 inch or 10 millimeters. (See above diagram)
3) Insert the EMT conduit into the EMT compression connector and then tighten.

*More installation and mounting information is available in the *Operations Guide*.
