This manual and related materials are the copyrighted property of CyberData Corporation. No part of this manual or related materials may be reproduced or transmitted, in any form or by any means (except for internal use by licensed customers), without prior express written permission of CyberData Corporation. This manual, and the products, software, firmware, and/or hardware described in this manual are the property of CyberData Corporation, provided under the terms of an agreement between CyberData Corporation and recipient of this manual, and their use is subject to that agreement and its terms.

**DISCLAIMER:** Except as expressly and specifically stated in a written agreement executed by CyberData Corporation, CyberData Corporation makes no representation or warranty, express or implied, including any warranty or merchantability or fitness for any purpose, with respect to this manual or the products, software, firmware, and/or hardware described herein, and CyberData Corporation assumes no liability for damages or claims resulting from any use of this manual or such products, software, firmware, and/or hardware. CyberData Corporation reserves the right to make changes, without notice, to this manual and to any such product, software, firmware, and/or hardware.

**OPEN SOURCE STATEMENT:** Certain software components included in CyberData products are subject to the GNU General Public License (GPL) and Lesser GNU General Public License (LGPL) “open source” or “free software” licenses. Some of this Open Source Software may be owned by third parties. Open Source Software is not subject to the terms and conditions of the CyberData COPYRIGHT NOTICE or software licenses. Your right to copy, modify, and distribute any Open Source Software is determined by the terms of the GPL, LGPL, or third party, according to who licenses that software.

Software or firmware developed by CyberData that is unrelated to Open Source Software is copyrighted by CyberData, subject to the terms of CyberData licenses, and may not be copied, modified, reverse-engineered, or otherwise altered without explicit written permission from CyberData Corporation.

**TRADEMARK NOTICE:** CyberData Corporation and the CyberData Corporation logos are trademarks of CyberData Corporation. Other product names, trademarks, and service marks may be the trademarks or registered trademarks of their respective owners.

Technical Support

The fastest way to get technical support for your VoIP product is to submit a VoIP Technical Support form at the following website:

<https://support.cyberdata.net/>

Phone: (831) 373-2601, Ext. 333

Email: [support@cyberdata.net](mailto:support@cyberdata.net)

Fax: (831) 373-4193

Company and product information is at [www.cyberdata.net](http://www.cyberdata.net).

---

# Revision Information

Revision 932050A, which corresponds to firmware version 22.0, was released on November 19, 2024.

---

## Pictorial Alert Icons

 <p>GENERAL ALERT</p>	<p><b>General Alert</b></p> <p>This pictorial alert indicates a potentially hazardous situation. This alert will be followed by a hazard level heading and more specific information about the hazard.</p>
	<p><b>Ground</b></p> <p>This pictorial alert indicates the Earth grounding connection point.</p>

---

## Hazard Levels

**Danger:** Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury. This is limited to the most extreme situations.

**Warning:** Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

**Caution:** Indicates a potentially hazardous situation which, if not avoided, could result in minor or moderate injury. It may also alert users against unsafe practices.

**Notice:** Indicates a statement of company policy (that is, a safety policy or protection of property).

The safety guidelines for the equipment in this manual do not purport to address all the safety issues of the equipment. It is the responsibility of the user to establish appropriate safety, ergonomic, and health practices and determine the applicability of regulatory limitations prior to use. Potential safety hazards are identified in this manual through the use of words Danger, Warning, and Caution, the specific hazard type, and pictorial alert icons.

# Important Safety Instructions

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
13. Prior to installation, consult local building and electrical code requirements.

**14. WARNING: The Intercom enclosure is not rated for any AC voltages!**

 <p>GENERAL ALERT</p>	<p><b>Warning</b> <i>Electrical Hazard:</i> This product should be installed by a licensed electrician according to all local electrical and building codes.</p>
 <p>GENERAL ALERT</p>	<p><b>Warning</b> <i>Electrical Hazard:</i> To prevent injury, this apparatus must be securely attached to the floor/wall in accordance with the installation instructions.</p>
 <p>GENERAL ALERT</p>	<p><b>Warning</b> The PoE connector is intended for intra-building connections only and does not route to the outside plant.</p>

---

## Abbreviations and Terms

<b>Abbreviation or Term</b>	<b>Definition</b>
A-law	A standard companding algorithm, used in European digital communications systems to optimize, i.e., modify, the dynamic range of an analog signal for digitizing.
AVP	Audio Video Profile
Cat 5	TIA/EIA-568-B Category 5
DHCP	Dynamic Host Configuration Protocol
LAN	Local Area Network
LED	Light Emitting Diode
Mbps	Megabits per Second.
NTP	Network Time Protocol
PBX	Private Branch Exchange
PoE	Power over Ethernet (as per IEEE 802.3af standard)
RTFM	Reset Test Function Management
SIP	Session Initiated Protocol
SRTP	Secure Real Time Protocol
u-law	A companding algorithm, primarily used in the digital telecommunication
UC	Unified Communications
VoIP	Voice over Internet Protocol

# 1 Configure the Device

---

## 1.1 Log In Page

1. Open your browser to the device IP address.

**Note** If the network does not have access to a DHCP server, the device will default to an IP address of 192.168.1.23.

**Note** Make sure that the PC is on the same IP network as the Intercom.

**Note** You may also download CyberData's VoIP Discovery Utility program which allows you to easily find and configure the default web address of the CyberData VoIP products.

CyberData's VoIP Discovery Utility program is available at the following website address:

<https://www.cyberdata.net/pages/discovery>

**Note** The Intercom ships in DHCP mode. To get to the **Home** page, use the discovery utility to scan for the device on the network and open your browser from there.

2. On the Log In Page (Figure 1-1), use the following default **Web Access Username** and **Web Access Password** to access the **Home Page** (Figure 1-3):

Web Access Username: **admin**

Web Access Password: **admin**

Figure 1-1. Log In Page

## 1.1.1 Restoring Defaults and Announcing the IP Address

The RTFM button is located on the back of the device.

To restore the device to its factory default settings (Table 1-1), hold the RTFM button for approximately seven seconds.

The device will default to DHCP to obtain an IP address, or will use 192.168.1.23 if a DHCP server is not present.

**Figure 1-2. RTFM Button**

**Table 1-1. Factory Default Settings**

Parameter	Factory Default Setting
IP Addressing	DHCP
IP Address <sup>a</sup>	192.168.1.23
Web Access Username	admin
Web Access Password	admin
Subnet Mask <sup>a</sup>	255.255.255.0
Default Gateway <sup>a</sup>	192.168.1.1

a. Default if there is not a DHCP server present.

## 1.2 Home Page

The **Home** page provides device specific information such as Serial Number, Mac Address, and Firmware version. This page is designed as an initial landing page to provide general information on the status of the device.

Figure 1-3. Home Page

The screenshot displays the CyberData Home Page interface. At the top, a purple header bar contains the CyberData logo, product information (Intercom, v22.0.0), serial and MAC addresses (186200002, 00:20:f7:03:efb7), available storage (1231MB), and device status (Idle). Action buttons for Test, Save, Cancel, Reboot, and Logout are also present.

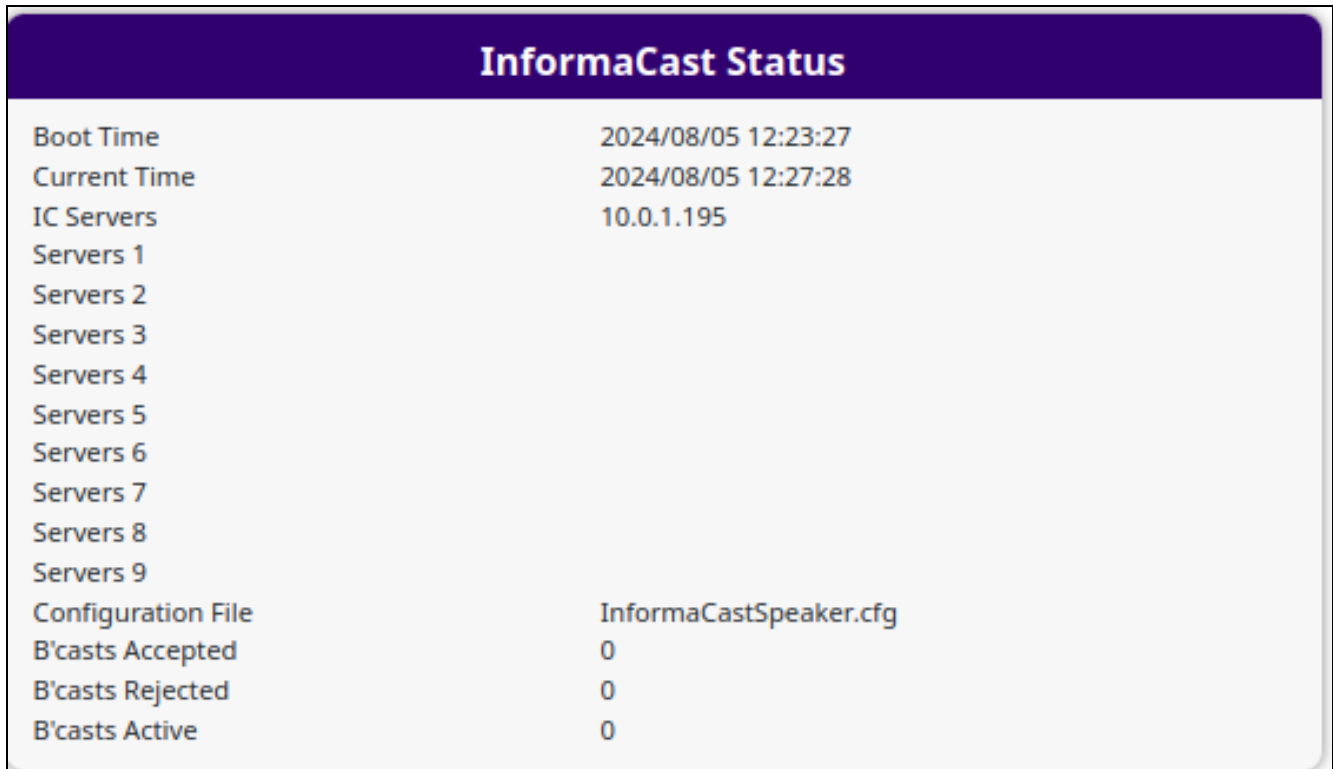

The main content area is divided into six panels:

- Device Configuration:** Lists Serial Number (186200002), Mac Address (00:20:f7:03:efb7), Firmware Version (v22.0.0), Partition 2 (v22.0.0), Partition 3 (v22.0.0), and Booting Partition (partition 3).
- Network Status:** Shows IP Address Protocol (DHCP), IP Address (10.10.1.70), Subnet Mask (255.0.0.0), Default Gateway (10.0.0.1), DNS Server 1 (10.0.1.56), and DNS Server 2.
- SIP Registration:** Displays SIP Mode (Enabled), Primary Server (Not registered), Backup Server 1 (Not registered), Backup Server 2 (Not registered), and Nighthringer Server (Not registered).
- Audio Configuration:** Lists SIP Volume (4), Multicast Volume (4), Ring Volume (4), Sensor Volume (4), Push to Talk Volume (4), Microphone Gain (4), and Push to Talk Microphone Gain (4).
- Sensor Status:** Shows Relay Status (Locked), Door Status (Closed), Intrusion (Active), and RGB Strobe (Installed).
- System Configuration:** Displays SIP Mode (Enabled), Multicast Mode (Disabled), and Event Mode (Disabled).

A vertical sidebar on the left contains navigation icons. The footer of the page includes the CyberData logo and a link to Support.

If you are using an InformaCast enabled device, you will see the following:

**Figure 1-4. InformaCast enabled Device**

InformaCast Status	
Boot Time	2024/08/05 12:23:27
Current Time	2024/08/05 12:27:28
IC Servers	10.0.1.195
Servers 1	
Servers 2	
Servers 3	
Servers 4	
Servers 5	
Servers 6	
Servers 7	
Servers 8	
Servers 9	
Configuration File	InformaCastSpeaker.cfg
B'casts Accepted	0
B'casts Rejected	0
B'casts Active	0

## 1.3 Device

The **Device** page allows for adjustment of settings that pertain to the physical device such as relay settings and time zone.

**Figure 1-5. Device Configuration Page**

The screenshot displays the 'Device Configuration Page' for a CyberData Intercom. The page header includes the CyberData logo, product information (Intercom, Firmware v22.0.0), serial and MAC addresses (186200002, 00:20:f7:03:ef:b7), available storage (1231MB), and device status (Idle). Action buttons for Test, Save, Cancel, Reboot, and Logout are visible. The main content area is divided into three sections: Relay Settings, Time Settings, and Misc Settings. Relay Settings includes options for DTMF Pulse Code (123), DTMF Pulse Code Duration (2 seconds), DTMF Activation Code (456), DTMF Deactivation Code (654), and various relay activation and ring tones. Time Settings includes NTP, NTP Server (north-america.pool.ntp.org), NTP Timezone (America/Los\_Angeles (-8)), and Current Time (Thu, 03 Oct 2024 11:21:21). Misc Settings includes Device Name (Outdoor Intercom), Button LED Lit when Idle (ON), Button LED Brightness (255), Push to Talk (PTT) (OFF), DTMF Push to Talk (PTT) (OFF), and Prevent Call Termination (OFF).

**Note** Devices with a keypad also have the following options for the keypad LED (brightness is from 0 to 255). See [Figure 1-6](#).

**Figure 1-6. Options for the Keypad LED**

This close-up shows two settings for the keypad LED: 'Keypad LED Lit when Idle:' with a dropdown menu set to 'ON', and 'Keypad LED Brightness:' with a text input field set to '255'.

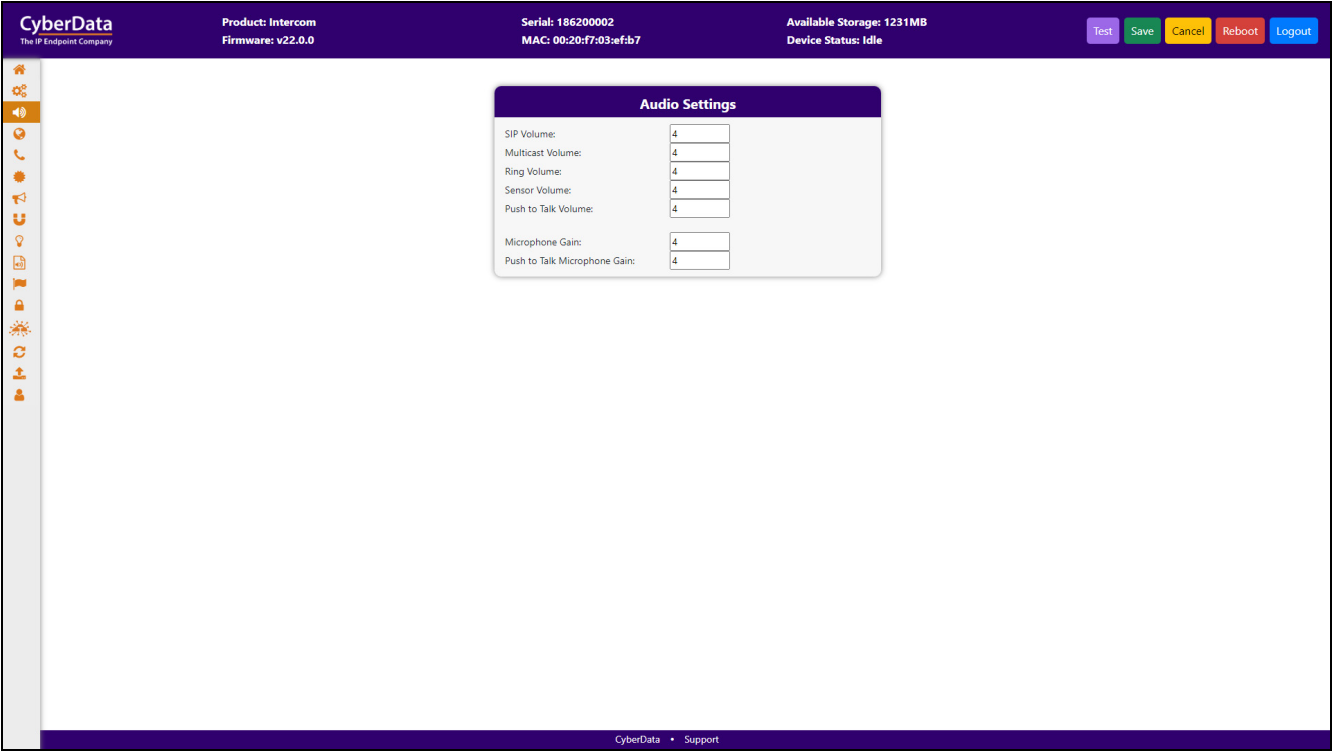

If you are using an InformaCast enabled device, you will see the following:

**Figure 1-7. InformaCast enabled Device**

The screenshot shows the 'InformaCast Settings' section. It features a header 'InformaCast Settings' and a single setting 'InformaCast Server:' with a text input field containing the URL 'http://10.0.1.195:8081/InformaCast/resources'.

# 1.4 Audio

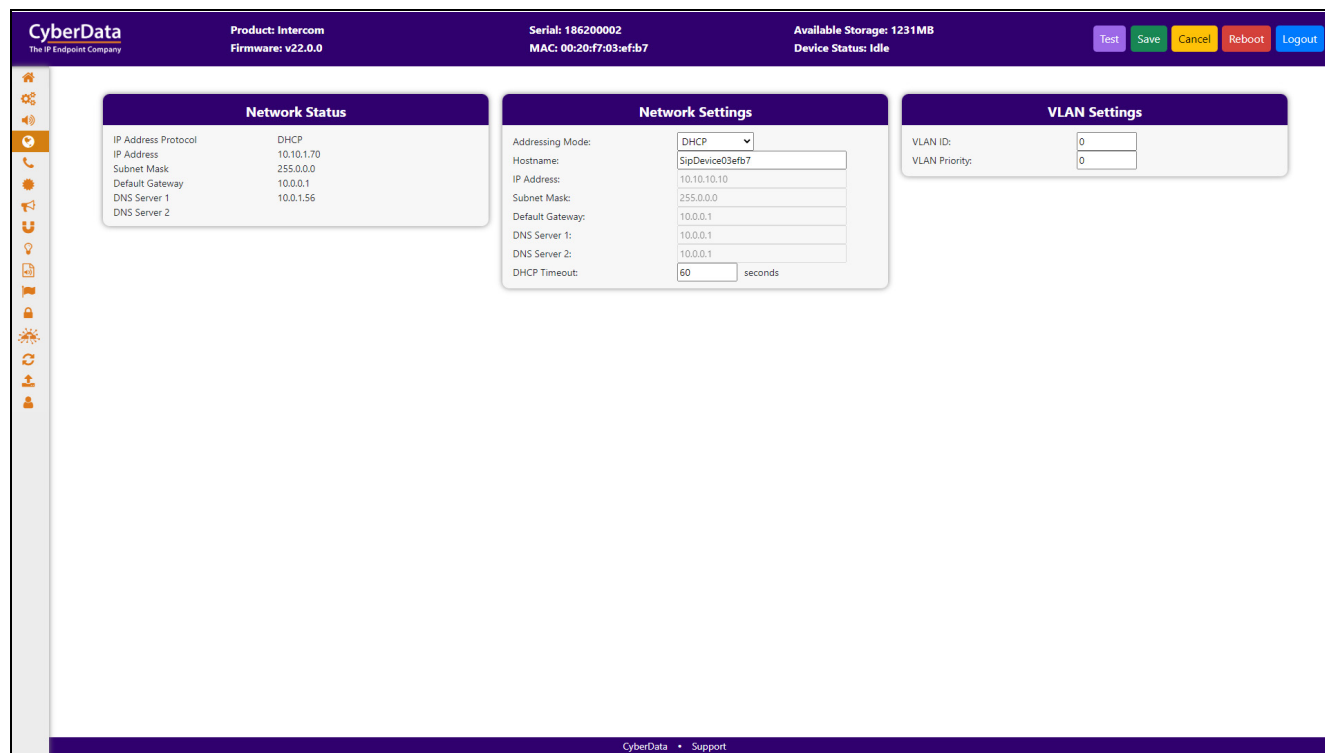

Figure 1-8. Audio Page

# 1.5 Network

The **Network** tab provides access to network-related settings. Assigning the device a static IP address or VLAN is done on this page.

**Figure 1-9. Network Page**

## 1.6 SIP (Session Initiation Protocol)

This page sets the options for phone calls. Configure up to 3 servers, with 2 acting as backup, and a server for the nightringer. The nightringer is a second sip extension that only rings, never connects to a call. Many customers use the nightringer in a hunt group.

Use this page to configure the options for security, transport, codec, and others.

**Note** For specific server configurations, go to the following website address:

<https://www.cyberdata.net/pages/connecting-to-ip-pbx-servers>

Figure 1-10. SIP Page

If you are using an InformaCast enabled device, you will see the following:

Figure 1-11. InformaCast enabled Device

InformaCast SIP Config:	DISABLED <span style="float: right;">▼</span>
-------------------------	---

---

## 1.6.1 Dial Out Extension Strings and DTMF Tones (using rfc2833)

Outgoing calls support delayed DTMF (rfc2833) with the first comma pausing 2 seconds and subsequent commas pausing 1 second.

---

## 1.6.2 Point-to-Point Configuration

Dialing point-to-point allows the device to call and a single endpoint. All CyberData endpoints and many phones can use this option. To do this, enable **SIP Operation**, do not enable **SIP Registration**, and use the endpoint's IP address as the Dial Out extension. Delayed DTMF is supported. See [Figure 1-12](#).

**Figure 1-12. SIP Page Set to Point-to-Point Mode**

## 1.7 SSL

The **SSL** tab allows for the adjustment of certificates used by the device. The certificates used for the web server, SIP Client, and Autoprovisioning can be changed here. It is also possible to add additional CA certificates on this page. CA Certificates allow the device to authenticate servers that it contacts.

Figure 1-13. SSL Page (1 of 2)

The screenshot displays the CyberData SSL configuration interface. At the top, the header includes the CyberData logo, product information (Intercom, v22.0.0), serial number (186200002), MAC address (00:20:f7:03:ef:b7), available storage (1231MB), and device status (Idle). Navigation buttons for Test, Save, Cancel, Reboot, and Logout are present.

Three main certificate configuration panels are shown:

- Web Server Certificate:** Shows certificate details (subject, country, state, locality, organization, common name, notBefore, notAfter) and buttons for 'Choose Files', 'Import Web Certificate', and 'Restore Web Certificate'.
- SIP Client Certificate:** Shows similar certificate details and buttons for 'Choose Files', 'Import SIP Certificate', and 'Restore SIP Certificate'. It also includes a 'Password (optional):' field.
- Autoprovisioning Client Certificate:** Shows similar certificate details and buttons for 'Choose Files', 'Import Autoprovisioning Certificate', and 'Restore Autoprovisioning Certificate'. It also includes a 'Password (optional):' field.

Below these panels is the **List of Trusted CAs** section, which includes an 'Upload CA Certificate' area with 'Choose Files' and 'Import CA Certificate' buttons. Below this are buttons for 'Download CyberData CA', 'Generate Cyberdata CSR', 'Remove All', and 'Restore Defaults'. A table lists the following CA certificates:

ID	CA Certificate Name	Info	Remove
1	CyberData_CA.pem	Info	Remove
2	DigiCert_Assured_ID_root_CA.crt	Info	Remove
3	DigiCert_Assured_ID_root_G2.crt	Info	Remove
4	DigiCert_Assured_ID_root_G3.crt	Info	Remove
5	DigiCert_Global_Root_CA.crt	Info	Remove
6	DigiCert_Global_Root_G2.crt	Info	Remove
7	DigiCert_Global_Root_G3.crt	Info	Remove
8	DigiCert_High_Assurance_EV_root_CA.crt	Info	Remove
9	DigiCert_Trusted_Root_G4.crt	Info	Remove

The footer of the page contains 'CyberData • Support'.

Figure 1-14. SSL Page (2 of 2)

The screenshot displays the CyberData management interface for the SSL page. At the top, the header includes the CyberData logo, product information (Intercom, v22.0.0), serial number (186200002), MAC address (00:20:f7:03:ef:b7), available storage (1231MB), and device status (Idle). Action buttons for Test, Save, Cancel, Reboot, and Logout are also present.

The main content area is a table listing 22 certificates, each with an 'Info' button and a 'Remove' button. The certificates are as follows:

ID	Certificate Name	Info	Remove
8	DigiCert_High_Assurance_EV_Root_CA.crt	Info	Remove
9	DigiCert_Trusted_Root_G4.crt	Info	Remove
10	GeoTrust_Global_CA.crt	Info	Remove
11	GeoTrust_Primary_Certification_Authority.crt	Info	Remove
12	GeoTrust_Primary_Certification_Authority_-_G2.crt	Info	Remove
13	GeoTrust_Primary_Certification_Authority_-_G3.crt	Info	Remove
14	GeoTrust_Universal_CA.crt	Info	Remove
15	GeoTrust_Universal_CA_2.crt	Info	Remove
16	Go_Daddy_Class_2_CA.pem	Info	Remove
17	Go_Daddy_Root_Certificate_Authority_-_G2.pem	Info	Remove
18	VeriSign_Class_3_Public_Primary_Certification_Authority_-_G4.crt	Info	Remove
19	VeriSign_Class_3_Public_Primary_Certification_Authority_-_G5.crt	Info	Remove
20	VeriSign_Universal_Root_Certification_Authority.crt	Info	Remove
21	Verisign_Class_1_Public_Primary_Certification_Authority.crt	Info	Remove
22	Verisign_Class_1_Public_Primary_Certification_Authority_-_G3.crt	Info	Remove
23	Verisign_Class_2_Public_Primary_Certification_Authority_-_G2.crt	Info	Remove
24	Verisign_Class_2_Public_Primary_Certification_Authority_-_G3.crt	Info	Remove
25	Verisign_Class_3_Public_Primary_Certification_Authority.crt	Info	Remove
26	Verisign_Class_3_Public_Primary_Certification_Authority_-_G3.crt	Info	Remove
27	thawte_Primary_Root_CA.crt	Info	Remove
28	thawte_Primary_Root_CA_-_G2.crt	Info	Remove
29	thawte_Primary_Root_CA_-_G3.crt	Info	Remove

The footer of the interface shows 'CyberData • Support'.

## 1.8 Multicast

The Multicast page allows the device to join up to ten paging zones that will activate the strobe when a stream is sent to its address.

A paging zone can consist of one or many CyberData multicast group-enabled products. There is no limit to how many endpoints can be in a given paging zone. Each multicast group is defined by a multicast address and port number.

Each multicast group is assigned a priority, allowing simultaneously arriving pages to be serviced based on importance. Multicast groups are compatible with IGMP through version 3. The device supports simultaneous SIP and Multicast.

Figure 1-15. Multicast Page

**CyberData**  
The IP Endpoint Company

Product: Intercom  
Firmware: v22.0.0

Serial: 186200002  
MAC: 00:20:f7:03:ef:b7

Available Storage: 1231MB  
Device Status: Idle

Test Save Cancel Reboot Logout

**Multicast Settings**

Receive Multicast Audio:

Polycom Default Channel:

Polycom Priority Channel:

Polycom Emergency Channel:

Priority	Address	Port	Name	Beep	Relay
0	239.168.3.1	2000	Background Music	DISABLED	DISABLED
1	239.168.3.2	3000	MG1	DISABLED	DISABLED
2	239.168.3.3	4000	MG2	DISABLED	DISABLED

9	239.168.3.10	11000	Emergency	DISABLED	DISABLED

SIP calls: Priority 4-5  
Port range: 2000-65535  
Priority: 9 is the highest, 0 is the lowest  
Audio Streams: Higher priority supersedes lower ones  
Priority 9: Plays at maximum volume

CyberData • Support

## 1.9 Sensor

The door sensor (pins 5 and 6) on the header can be used to monitor a door's open or closed state. There is an option on the **Sensor** page to trigger on an open or short condition on these pins. The door sensor alarm will be activated when the **Door Open Timeout** parameter has been met.

The intrusion sensor is an optical sensor installed on the Intercom board and will be activated when the Intercom is removed from the case.

Each sensor can trigger up to five different actions:

- Flash the LED until the sensor is deactivated (roughly 10 times/second)
- Activate the relay until the sensor is deactivated
- Loop an audio file out of the Intercom speaker until the sensor is deactivated
- Call an extension and establish two way audio
- Call an extension and play a pre-recorded audio file

**Note** Calling a preset extension can be set up as a point-to-point call, but currently can't send delayed DTMF tones.

Figure 1-16. Sensor Page

The screenshot shows the CyberData web interface for configuring sensors. The top header includes the CyberData logo, product information (Intercom, v22.0.0), serial and MAC addresses, available storage (1231 MB), and device status (Idle). A navigation sidebar is on the left. The main content area is divided into two panels: 'Door Sensor Settings' and 'Intrusion Sensor Settings'. The 'Door Sensor Settings' panel includes fields for Sensor Type (Normally Open), Open Timeout (0 seconds), and five actions (Flash Button LED, Activate Relay, Play Audio Locally, Call Extension, Dial Out Extension) all set to Disabled. The 'Intrusion Sensor Settings' panel includes fields for Flash Button LED, Activate Relay, Play Audio Locally, Call Extension, Dial Out Extension (204), Dial Out ID (id204), Play Recorded Audio (Disabled), and Audio Playbacks (0). A footer at the bottom right contains 'CyberData • Support'.

# 1.10 Strobe

Figure 1-17. Strobe Page

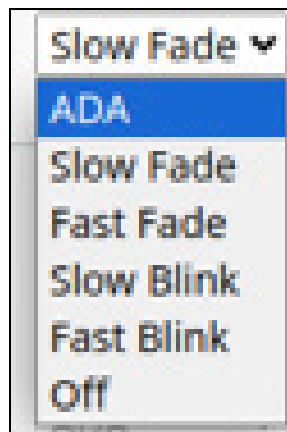

The screenshot shows the CyberData Strobe configuration page. At the top, there is a header with the CyberData logo and system information: Product: Intercom, Firmware: v22.0.0, Serial: 186200002, MAC: 00:20:f7:03:ef:b7, Available Storage: 1231MB, and Device Status: Idle. There are buttons for Test, Save, Cancel, Reboot, and Logout.

The main content is divided into three sections:

- SIP RGB Strobe Settings:**
  - SIP Operation Enabled:** Activate Strobe on Ring: OFF. Table with columns: Scene (ADA), Brightness (255), Color (Blue), Red (255), Green (255), Blue (255), Preview.
  - Activate Strobe during Call:** OFF. Table with columns: Scene (ADA), Brightness (255), Color (Blue), Red (255), Green (255), Blue (255), Preview.
  - SIP Registration Enabled:** Activate Strobe on MWI: OFF. Table with columns: Scene (ADA), Brightness (255), Color (Blue), Red (255), Green (255), Blue (255), Preview.
  - Activate Strobe on Nightring:** OFF. Table with columns: Scene (ADA), Brightness (255), Color (Blue), Red (255), Green (255), Blue (255), Preview.
- Multicast RGB Strobe Settings:** Multicast Disabled. Table with columns: Priority, Scene, Brightness, Color, Red, Green, Blue, Preview. Rows 0-9 show configurations for ADA with Brightness 255 and Color Blue.
- Sensor RGB Strobe Settings:**
  - Activate Strobe on Door Sensor:** OFF. Table with columns: Scene (ADA), Brightness (255), Color (Blue), Red (255), Green (255), Blue (255), Preview.
  - Activate Strobe on Intrusion Sensor:** OFF. Table with columns: Scene (ADA), Brightness (255), Color (Blue), Red (255), Green (255), Blue (255), Preview.

For each option, there are 5 scenes available:

Figure 1-18. 5 Scenes Available

Use the red, green, and blue values to create custom colors.

The ADA scene flashes white at maximum brightness (255). Other scenes can adjust the brightness, from 0 to 255.

**Figure 1-19. 10 Colors**

If you are using an InformaCast enabled device, you will see the following:

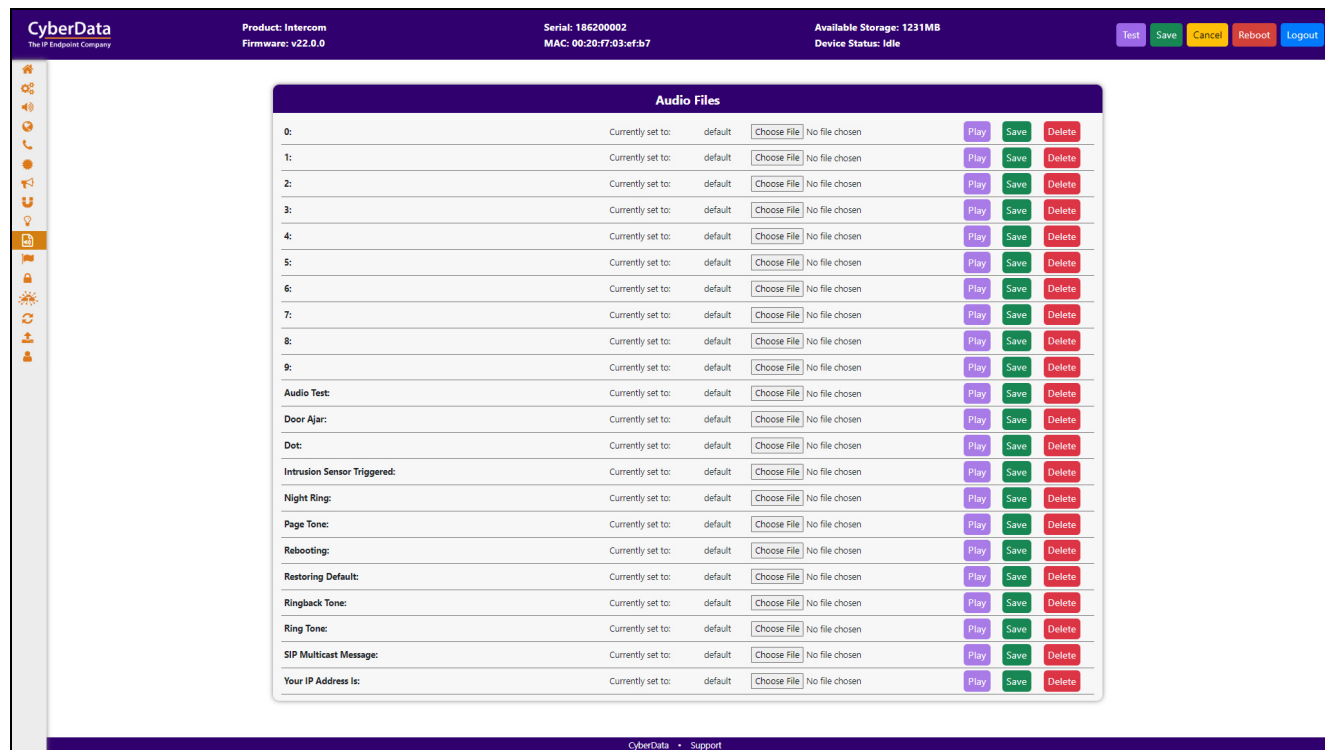

**Figure 1-20. InformaCast enabled Device**

InformaCast RGB Strobe Settings							
Priority	Scene	Brightness	Color	Red	Green	Blue	
0	ADA	255	Color	255	255	255	Preview
1	ADA	255	Color	255	255	255	Preview
2	ADA	255	Color	255	255	255	Preview
3	ADA	255	Color	255	255	255	Preview
4	ADA	255	Color	255	255	255	Preview
5	ADA	255	Color	255	255	255	Preview
6	ADA	255	Color	255	255	255	Preview
7	ADA	255	Color	255	255	255	Preview
8	ADA	255	Color	255	255	255	Preview
9	ADA	255	Color	255	255	255	Preview

## 1.11 Audiofiles

The **Audiofiles** page is used to add custom audio to the board. User uploaded audio will take precedence over the audio files shipped with the device.

**Figure 1-21. Audiofiles Page**

**Note** The keypad also has the audio file “Blacklist message”: [Figure 1-22](#).

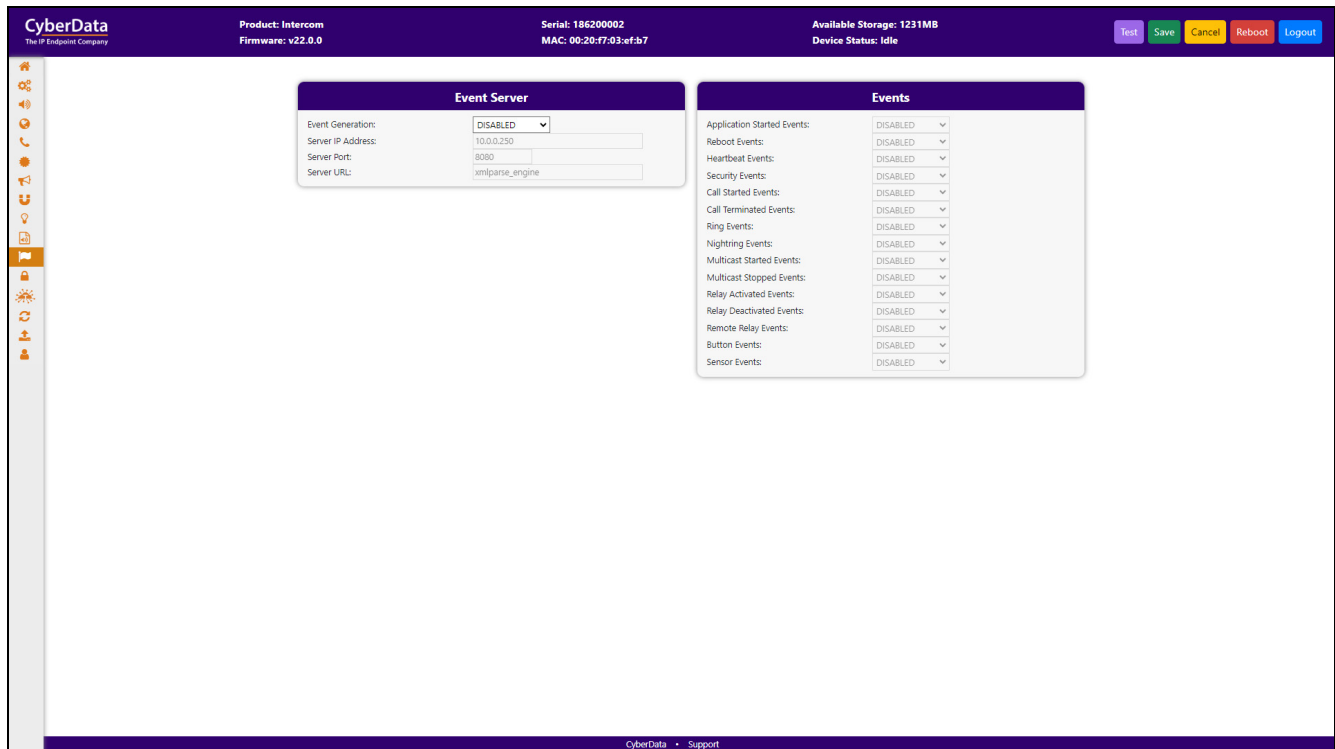

**Figure 1-22. Keypad audio file “Blacklist message”**

## 1.12 Events

The **Events** page specifies a remote server that can be used to receive HTTP POST events when actions take place on the device.

**Figure 1-23. Events Page**

If you are using an InformaCast enabled device, you will see the following:

**Figure 1-24. InformaCast enabled Device**

---

## 1.12.1 Example Packets for Events

The server and port are used to point to the listening server and the 'Remote Event Server URL' is the destination URL (typically the script running on the remote server that's used to parse and process the POST events).

**Note** The XML is URL-encoded before transmission so the following examples are not completely accurate.

Here are example packets for every event:

```
POST xmlparse_engine HTTP/1.1
Host: 10.0.3.79
User-Agent: CyberData/1.0.0
Content-Length: 197
Content-Type: application/x-www-form-urlencoded
```

```
<?xml version="1.0" encoding="ISO-8859-1"?>
<cyberdata NAME='CyberData VoIP Device' MAC='0020f70015b6'>
<event>POWERON</event>
</cyberdata>
```

```
POST xmlparse_engine HTTP/1.1
Host: 10.0.3.79
User-Agent: CyberData/1.0.0
Content-Length: 199
Content-Type: application/x-www-form-urlencoded
```

```
<?xml version="1.0" encoding="ISO-8859-1"?>
<cyberdata NAME='CyberData VoIP Device' MAC='0020f70015b6'>
<event>HEARTBEAT</event>
</cyberdata>
```

```
POST xmlparse_engine HTTP/1.1
Host: 10.0.3.79
User-Agent: CyberData/1.0.0
Content-Length: 196
Content-Type: application/x-www-form-urlencoded
```

```
<?xml version="1.0" encoding="ISO-8859-1"?>
<cyberdata NAME='CyberData VoIP Device' MAC='0020f70015b6'>
<event>BUTTON</event>
</cyberdata>
```

```
POST xmlparse_engine HTTP/1.1
Host: 10.0.3.79
User-Agent: CyberData/1.0.0
Content-Length: 201
Content-Type: application/x-www-form-urlencoded
```

```
<?xml version="1.0" encoding="ISO-8859-1"?>
<cyberdata NAME='CyberData VoIP Device' MAC='0020f70015b6'>
<event>CALL_ACTIVE</event>
</cyberdata>
```

```
POST xmlparse_engine HTTP/1.1
Host: 10.0.3.79
User-Agent: CyberData/1.0.0
Content-Length: 205
Content-Type: application/x-www-form-urlencoded

<?xml version="1.0" encoding="ISO-8859-1"?>
<cyberdata NAME='CyberData VoIP Device' MAC='0020f70015b6'>
<event>CALL_TERMINATED</event>
</cyberdata>

POST xmlparse_engine HTTP/1.1
Host: 10.0.3.79
User-Agent: CyberData/1.0.0
Content-Length: 197
Content-Type: application/x-www-form-urlencoded

<?xml version="1.0" encoding="ISO-8859-1"?>
<cyberdata NAME='CyberData VoIP Device' MAC='0020f70015b6'>
<event>RINGING</event>
</cyberdata>

POST xmlparse_engine HTTP/1.1
Host: 10.0.3.79
User-Agent: CyberData/1.0.0
Content-Length: 234
Content-Type: application/x-www-form-urlencoded

<?xml version="1.0" encoding="ISO-8859-1"?>
<cyberdata NAME='CyberData VoIP Device' MAC='0020f70015b6'>
<event>MULTICAST_START</event>
<index>8</index>
</cyberdata>

</cyberdata>
```

## 1.13 Door Strike Relay

When a Dual Door Strike Relay (DDSR) is associated with a device, the **Door Strike Relay** page appears (Figure 1-25). The DTMF codes entered during a phone call will activate the relays for the specified times, with **0** activating/deactivating indefinitely, until deactivated from the web page, or the DTMF code is entered.

Entering airlock activates the outer relay (relay 2 until the door (door 2) is opened and closed or until it reaches the **Energize Time** configured in the **Configure DSR** dialog box. When door 2 closes, the inner relay (relay1) is activated until door 1 closes. Exit airlock activates the inner relay (relay 1).

If either door is opened longer than the time specified in **Remote Door Sensor Settings**, the device can make a call to a specified extension.

Figure 1-25. Door Strike Relay Page

The screenshot displays the CyberData web interface for configuring a Door Strike Relay. At the top, the header includes the CyberData logo, product information (Intercom, v22.0.0), serial number (186200002), MAC address (00:20:F7:03:ef:b7), available storage (1231MB), and device status (Idle). Navigation buttons for Test, Save, Cancel, Reboot, and Logout are visible.

The main content area is divided into three sections:

- Remote Relay Settings:** This section is associated with device 375200007 (10.10.1.104). It features a table for configuring relays:
 

Relay	DTMF Code	Duration (seconds)	Action
Relay 1:	<input type="text" value="321"/>	<input type="text" value="2"/>	<input type="button" value="Pulse"/> <input type="button" value="Deactivate"/>
Relay 2:	<input type="text" value="456"/>	<input type="text" value="2"/>	<input type="button" value="Pulse"/> <input type="button" value="Deactivate"/>
Both Relays:	<input type="text" value="654"/>	<input type="text" value="2"/>	<input type="button" value="Pulse"/> <input type="button" value="Deactivate"/>
Enter Airlock:	<input type="text" value="789"/>		<input type="button" value="Enter"/> <input type="button" value="Deactivate"/>
Exit Airlock:	<input type="text" value="987"/>		<input type="button" value="Exit"/> <input type="button" value="Deactivate"/>

 A note below states: "Note: A duration of 0 will permanently trigger the relay."
- Remote Door Sensor Settings:** This section includes fields for Door Open Timeout (0 seconds), Make call to extension (DISABLED), Play recorded audio (DISABLED), Dial Out Extension (204), and Dial Out ID (i204). A Refresh button is located below.
- Discovered Remote Relays:** A table listing discovered relays:
 

Product Type	IP Address	MAC Address	Serial Number	Name	Version	Action
DoorLock	10.10.1.104	00:20:F7:04:e2:d1	375200007	LOCK375200007	v6.0.0b03	<input type="button" value="Discover"/> <input type="button" value="Config"/> <input type="button" value="Disassociate"/>
DoorLock	10.10.0.51	00:20:F7:05:5e:21	375200300	LOCK375200300	v5.0.4	<input type="button" value="View"/>

The footer of the page contains the text "CyberData - Support".

## 1.14 Terminus

Terminus Cloud Control™ allows users to configure, monitor, and manage notification functions for CyberData's extensive VoIP product line, all from a single, easy-to-use platform. To learn more about Terminus Cloud Control™, go to <https://www.cyberdata.net/pages/terminus>.

The **Terminus** page allows for configuration of settings related to Terminus Cloud Control™.

**Figure 1-26. Terminus Page**

The screenshot displays the Terminus configuration interface. At the top, a purple header bar contains the CyberData logo and system information: Product: Intercom, Firmware: v22.0.0, Serial: 186200002, MAC: 00-20-f7-03-ef-b7, Available Storage: 1231MB, and Device Status: Idle. Action buttons for Test, Save, Cancel, Reboot, and Logout are located in the top right. A vertical sidebar on the left contains navigation icons. The main content area features two configuration panels:

- Discovery Setting:**
  - Multicast Address: 239.27.32.4
  - Time to Live: 255
  - Discovery Interval: 60 seconds
- Lockdown Settings:**
  - Lock Down Mode: Disabled
  - Relay: No Action
  - DSR Remote Relay 1: No Action
  - DSR Remote Relay 2: No Action

The footer of the page includes the text "CyberData • Support".

## 1.15 Autoprovisioning

Enabling autoprovisioning allows the device to download provisioning files from a server. It defaults to using DHCP, with options configured in dhcpd.conf on the DHCP server. The file name is <mac address>.xml and if not found, 000000cd.xml.

If a server is named, DHCP is bypassed, and the device will look for a file on the named server..

If a file is named, it will be downloaded instead of <mac address>.xml.

If a server is named, **Use tftp** searches for the file on a tftp server instead of http. If the server is secured (with a password), use **Verify Server Certificate** (username/password) to access it. When using DHCP, these options are configured in dhcpd.conf.

**Autoprov autoupdate**, **Autoprov at time**, and **Autoprov when idle** options are available with either DHCP or a named server.

The template is an xml file with all options set to default values.

Figure 1-27. Autoprovisioning Page

The screenshot displays the CyberData web interface for configuring autoprovisioning. At the top, the header shows the CyberData logo, product information (Intercom, v22.0.0), serial number (186200002), MAC address (00:20:F7:03:ef:b7), available storage (1231MB), and device status (Idle). Navigation buttons (Test, Save, Cancel, Reboot, Logout) are located in the top right.

The main content area is divided into two panels:

- Autoprov Settings:** A form with the following fields:
  - Autoprov: **ENABLED** (dropdown)
  - Autoprov Server:
  - Autoprov Filename:
  - Use tftp: **DISABLED** (dropdown)
  - Verify Server Certificate: **DISABLED** (dropdown)
  - Username:
  - Password:
  - Autoprov autoupdate:  minutes
  - Autoprov at time:  HHMM
  - Autoprov when idle:  minutesA **Download Template** button is located at the bottom of this panel.
- Autoprov Log:** A scrollable log window showing the following entries:
  - 2024-10-03 11:46:17 Autoprov: no autoprov triggers. Exiting...
  - 2024-10-03 11:46:16 Autoprovisioning on boot
  - 2024-10-03 11:46:16 Autoprov found server="http://10.0.0.242" in dhcp option 43
  - 2024-10-03 11:46:16 Autoprov looking for 0020f703efb7.xml at http://10.0.0.242
  - 2024-10-03 11:46:16 Autoprov downloading http://10.0.0.242/0020f703efb7.xml
  - 2024-10-03 11:46:17 Got autoprov file. Parsing "0020f703efb7.xml"
  - 2024-10-03 11:46:17 Autoprov: Processing ssl certificates
  - 2024-10-03 11:46:17 No certificate elements in SSLCertificates
  - 2024-10-03 11:46:17 Autoprov: Processing audio files
  - 2024-10-03 11:46:18 Autoprov: FirmwareSettings: config not found
  - 2024-10-03 11:46:18 DeviceConfig: error = False
  - 2024-10-03 11:46:18 SSLCertificates: error = None
  - 2024-10-03 11:46:18 AudioFiles: error = False
  - 2024-10-03 11:46:18 BellSchedule: error = False
  - 2024-10-03 11:46:18 FirmwareSettings: error = None

## 1.16 Firmware

**Note** CyberData strongly recommends that you do not upgrade the firmware when the device is likely to be in use.

To upgrade the firmware of your device:

1. Download the latest firmware from the following CyberData web site, and locate your device:

<https://www.cyberdata.net/collections/sip>

<https://www.cyberdata.net/collections/singlewire> (for InformaCast Enabled devices)

2. Unzip the firmware version file. This file may contain the following:

- Firmware file
- Release notes
- Autoprovisioning template

 GENERAL ALERT	<b>Caution</b> <b>Equipment Hazard:</b> Do not reboot the device. It will reboot automatically when the process is complete.
--	---

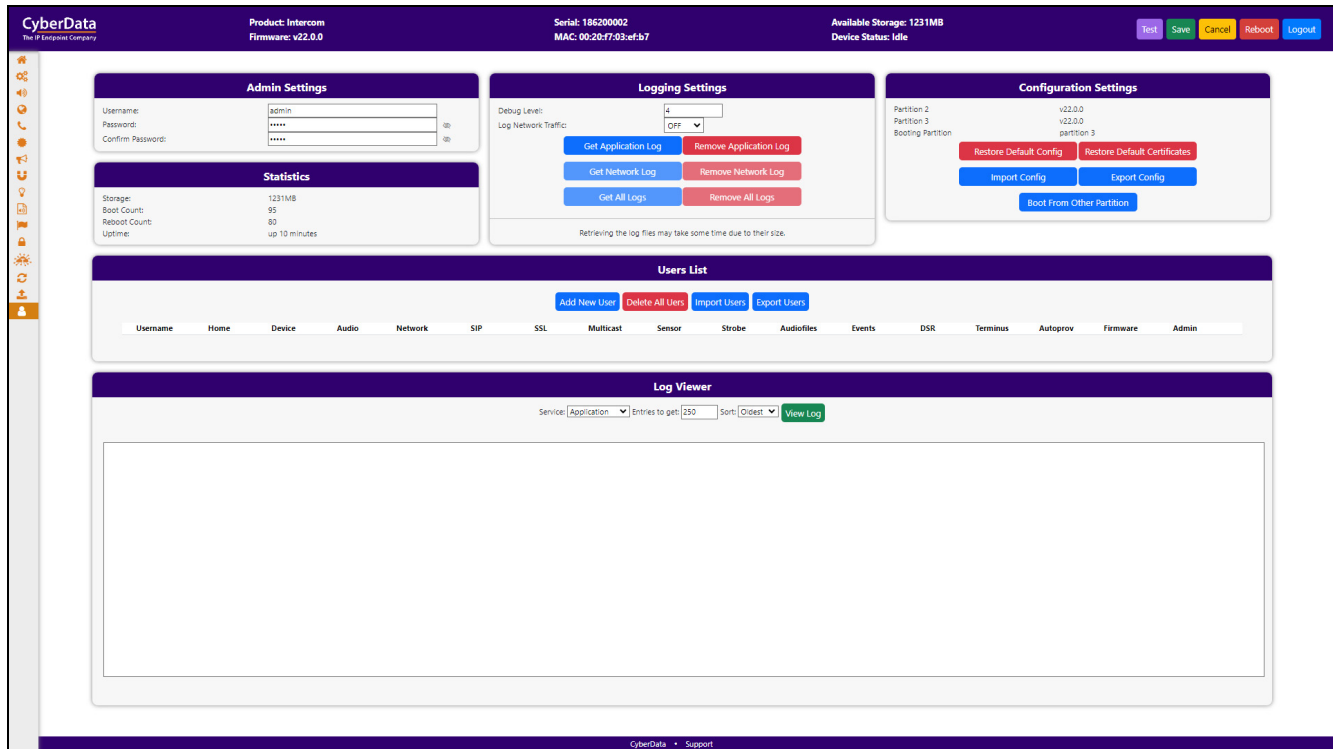

Figure 1-28. Firmware Page

# 1.17 Admin

The administrator uses the Users List to create new accounts, assigning user names and passwords, and granting access to specific web pages.

**Figure 1-29. Admin Page**

## 1.18 Keypad Pages

### 1.18.1 Buttons

**Note** **SECURITY** must be selected as the dial mode to use security settings and to send multicast.

**Figure 1-30. Buttons Page**

The screenshot displays the configuration interface for a Keypad Intercom device. The top header includes the CyberData logo, product name (Keypad Intercom), serial number (214200002), MAC address (00:20:f7:03:f5:e3), available storage (1271MB), and device status (Idle). Action buttons for Test, Save, Cancel, Reboot, and Logout are visible in the top right.

The main content area is divided into three sections:

- Dial Settings:**
  - Keypad Mode: TELEPHONE (dropdown)
  - Play Button Tones: ON (dropdown)
  - Speed Dial Timeout: 2 seconds (input field)
- Security Mode Settings:**
  - Relay Activation Code: 9876123 (input field)
  - Relay Deactivation Code: 9876456 (input field)
  - Telephone Dialout: ON (dropdown)
  - Send Multicast Audio: Disabled (dropdown)
  - Multicast Address: 224.5.5.5 (input field)
  - Multicast Port: 5050 (input field)
  - Repeat Message: 1 (input field)
- Keypad Mapping:** A table mapping buttons to extensions and extension IDs.

Button	Extension	Extension ID
Keypad 1	241	id241
Keypad 2	242	id242
Keypad 3	243	id243
Keypad 4	244	id244
Keypad 5	245	id245
Keypad 6	246	id246
Keypad 7	247	id247
Keypad 8	248	id248
Keypad 9	249	id249
Keypad 0	2411	id2411
Keypad *	2410	id2410
Keypad #	2412	id2412
Call Button	204	id204

## 1.18.2 Security

**Note** When a user from the access list enters their access code, the actions that follow are configured on this page. **SECURITY** mode must be enabled on the **Buttons** page.

Figure 1-31. Security Page

The screenshot shows the Security Page configuration interface for a Keypad Intercom device. The page is titled "CyberData The IP Endpoint Company" and includes the following information:

- Product: Keypad Intercom
- Firmware: v22.0.0
- Serial: 214200002
- MAC: 00:20:f7:03:f5:e3
- Available Storage: 1271MB
- Device Status: Idle

The page contains three main configuration sections:

- Relay Settings:**
  - Activate Relay on Valid Code: ON
  - Activate DSR on Valid Code: OFF
  - Relay Timeout: 6 seconds
- Audio Settings:**
  - Buzz while Relay Active: OFF
  - Play Tone on Invalid Code Entry: OFF
- Sensor Settings:**
  - Buzz on Door Open Timeout: OFF
  - Sensor Type: Normally Open
  - Sensor Open Timeout: OFF
  - DSR Open Timeout: OFF
- Blacklist Settings:**
  - SIP Call Audio Message: Disabled
  - Dial Out Extension: 666
  - Dial Out ID: ext666
  - Repeat Message: 0
  - Send Multicast Audio: Disabled
  - Multicast Address: 234.6.6.6
  - Multicast Port: 666
  - Repeat Message: 0

The interface also features a top navigation bar with buttons for Test, Save, Cancel, Reboot, and Logout, and a vertical sidebar on the left with various system icons.

### 1.18.3 Access List

Figure 1-32. Access List Page

The screenshot displays the 'Access List' page in the CyberData management interface. The top navigation bar contains the following information: CyberData logo, Product: Keypad Intercom, Firmware: v22.0.0, Serial: 214200002, MAC: 00:20:f7:03:f5:e3, Available Storage: 1271 MB, and Device Status: Idle. Action buttons for Test, Save, Cancel, Reboot, and Logout are also present. The main content area features a table with the following data:

ID	Name	Valid From	Valid To	Blacklist	Lockdown Override		
0	Jason	All	All	NO	NO	Edit	Delete
1		All	All	NO	NO	Add	Delete
2		All	All	NO	NO	Add	Delete
3		All	All	NO	NO	Add	Delete
4		All	All	NO	NO	Add	Delete
5		All	All	NO	NO	Add	Delete
6		All	All	NO	NO	Add	Delete
7		All	All	NO	NO	Add	Delete
8		All	All	NO	NO	Add	Delete
9		All	All	NO	NO	Add	Delete

Below the table is a pagination control showing page 1 of 10.

# 1.18.4 Access Log

**Note** The Access log is exported in CSV format, and is compatible with many spreadsheet programs, including MS Excel and Google Sheets.

Figure 1-33. Access Log Page

The screenshot shows the CyberData management interface. At the top, there is a header bar with the following information: Product: Keypad Intercom, Serial: 214200002, Available Storage: 1271 MB, Firmware: v22.0.0, MAC: 00:20:f7:03:f5:e3, and Device Status: Idle. On the right side of the header, there are buttons for Test, Save, Cancel, Reboot, and Logout. A vertical sidebar on the left contains various navigation icons. The main content area displays the 'Access Log' page, which includes a search bar, three buttons (Clear Log, Download Log, Refresh Log), and a table of log entries. The table has five columns: Event #, Timestamp, Action, User ID, and User Name. The entries are numbered 1 through 6, with timestamps from Mon 2024-10-07 15:05:21 PM to 15:05:44 PM. The actions include 'Relay activated', 'User authenticated', and 'Valid security code'. The User ID for all entries is 0, and the User Name is Jason. At the bottom of the table, it says 'Showing 1 to 6 of 6 rows'.

Event #	Timestamp	Action	User ID	User Name
6	Mon 2024-10-07 15:05:44 PM	Relay activated		
5	Mon 2024-10-07 15:05:44 PM	User authenticated	0	Jason
4	Mon 2024-10-07 15:05:44 PM	Valid security code	0	Jason
3	Mon 2024-10-07 15:05:21 PM	Relay activated		
2	Mon 2024-10-07 15:05:21 PM	User authenticated	0	Jason
1	Mon 2024-10-07 15:05:21 PM	Valid security code	0	Jason

---

## 1.19 Command Interface

Some functions on the device can be activated using simple POST commands to the web interface. The examples in [Table 1-2](#) use the free unix utility, **wget commands**. However, any program that can send HTTP POST commands to the device should work.

---

### 1.19.1 Command Interface Post Commands

These commands require an authenticated session (a valid username and password to work).

**Table 1-2. Command Interface Post Commands**

Device Action	HTTP Post Command <sup>a</sup>
Reboot	wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.154/command" --post-data "request=reboot"
Place call to extension (example: extension 600)	wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.154/command" --post-data "request=call&extension=600"
Test Relay	wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.154/command" --post-data "request=test_relay"
Test Audio	wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.154/command" --post-data "request=test_audio"
Speak IP Address	wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.154/command" --post-data "request=speak_ip_address"
Test Mic	wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.154/command" --post-data "request=test_mic"
Swap boot partitions	wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.154/command" --post-data "request=swap_boot_partition"

a.Type and enter all of each http POST command on one line.

# Appendix A: Troubleshooting/Technical Support

---

## A.1 Contact Information

Contact            CyberData Corporation  
                      3 Justin Court  
                      Monterey, CA 93940 USA  
                      [www.cyberdata.net](http://www.cyberdata.net)  
                      Phone: 831-373-2601  
                      Fax: 831-373-4193

Sales                Sales 831-373-2601, Extension 334

Technical Support    The fastest way to get technical support for your VoIP product is to submit a VoIP Technical Support form at the following website:

<https://support.cyberdata.net/>

The Support Form initiates a ticket which CyberData uses for tracking customer requests. Most importantly, the Support Form tells us which PBX system and software version that you are using, the make and model of the switch, and other important information. This information is essential for troubleshooting. Please also include as much detail as possible in the **Comments** section of the Support Form.

Phone: (831) 373-2601, Extension 333
