## Mounting

You have the option to use the following mounting template to mark, and then drill two 3/16-inch (0.1875-inch) holes for the mounting anchors.

To install and mount the Singlewire/SIP Paging Adapter:

1. Install the mounting anchors in the holes, and position the Singlewire/SIP Paging Adapter mounting holes over the anchors.

2. Use the two #6 sheet metal screws to secure the Singlewire/SIP Paging Adapter onto the mounting surface.

3.500

Drill Hole Size for Anchor Installation: 3/16-inch (0.1875-inch)

Dimensions

Installation Quick Reference
InformaCast Enabled Paging Adapter
011280

Parameter	Factory Default Setting
IP Addressing	DHCP
IP Address[a]	10.10.10.10
Web Access Username	admin
Web Access Password	admin
Subnet Mask[a]	255.0.0.0
Default Gateway[a]	10.0.0.1

a. Default if there is not a DHCP server present.

Getting Started

• Be sure that you have received all the parts described in the Parts List section.

• Download the *Operations Guide* at the **Downloads** page at following website: **https://www.cyberdata.net/products/011280**

• WARNING: This product should be installed by a licensed electrician according to all local electrical and building codes.

• WARNING: To prevent injury, this apparatus must be securely attached to the floor/wall in accordance with the installation instructions.

• WARNING: The PoE connector is intended for intra-building connections only and does not route to the outside plant.

• WARNING: This enclosure is not rated for any AC voltages!

Verifying Operations and Settings

When you plug in the Ethernet cable or power supply:

- The **GREEN**/**BLUE** Status LED and the **GREEN** **Paging** LED both blink at a rate of 10 times per second during the initial network setup.

- The round, **GREEN**/**BLUE** Status LED on the front of the Singlewire/SIP Paging Adapter comes on indicating that the power is on. Once the device has been initialized, this LED blinks at one second intervals.

- The square, **YELLOW** **Link** LED above the Ethernet port indicates that the network connection has been established at 100Mbit speed.

- The **GREEN** Paging LED comes on after the device is booted and initialized. This LED blinks when a page is in progress. You can disable **Beep on Initialization** on the **Device Configuration** page.

Link (**YELLOW** LED) Activity (**GREEN** LED)

Status (**GREEN**/**BLUE** LED) Paging (**GREEN** LED)

Setting Up the InformaCast Enabled Paging Adapter

PoE

Non PoE with 48 VDC Power Supply

48VDC

Chassis Ground

Chassis ground

To set up the device, connect the device to your network:

Poe

- For PoE, plug one end of an 802.3af Ethernet cable into the Singlewire/SIP Paging Adapter Ethernet port. Plug the other end of the Ethernet cable into your network. See the figure on the left.

Non-Poe

- For Non-PoE, connect the Singlewire/SIP Paging Adapter to a 48VDC power supply. See the figure on the left.

- **Note**: Do not use both PoE and external power.

Chassis Ground

- If required, connect the earth grounding wire to the Chassis Ground. See the figure on the left.

Connections

Page Port Output Connections	
Pin	**Description**
1	Fault Sense Input (Common)
2	Fault Sense Input (Sense)
3	Positive 600-Ohm Audio Output[a]
4	Negative 600-Ohm Audio Output[a]
5	Audio Ground Reference
6	Relay Contact - Common[b]
7	Relay Contact - Normally Open[b]

a. The 600-Ohm audio output of the page port is also suited for interfaces with lower input impedances.
b. 1 Amp at 30 VDC for continuous loads

RTFM Switch

To announce the IP address:	**To restore the factory default settings:**
1. Briefly press and then quickly release the RTFM switch. **Note**: The IP address announcement can be heard if a speaker or amplified speaker is connected to the unit.	**1.** Press and hold the **RTFM** switch while all the indicator lights turn off. **2.** Continue to press the switch until after the indicator lights turn back on, and then release the switch. **Note**: The "Restoring Defaults" announcement can be heard if a speaker or amplified speaker is connected to the unit. **3.** All Singlewire/SIP Paging Adapter settings are restored to the factory defaults, and the unit reboots.
