

To mount the Intercom:

1. Make a wall cutout as shown in the picture.
2. Use a flat blade screwdriver to remove the knockout (KO) of the gang box.
3. Feed the ground wire (shown in the “Ground Connection” section) and the network cable from the wall cutout through the knockout hole of the gang box.
4. Create a service loop for both the ground wire and network cable.
5. Plug the network cable into the J1 connector.
6. Make sure that the arrow labels on the sides of the gang box are pointing up. This will ensure that the intrusion sensor functions properly.
7. Fold down all of the flagnuts, and then insert the gang box into the wall cutout.
8. Tighten the flagnuts with a size #2 Phillips screwdriver.
9. Use either a size #2 Phillips screwdriver or a Torx Driver Bit to secure the Intercom faceplate assembly to the gang box with either Phillips drive screws or security Torx drive screws.

Intercom with Keypad, Flush Mount  
011308

Parameter	Factory Default Setting
IP Addressing	DHCP
IP Address <sup>a</sup>	10.10.10.10
Web Access Username	admin
Web Access Password	admin
Subnet Mask <sup>a</sup>	255.0.0.0
Default Gateway <sup>a</sup>	10.0.0.1

a. Default if there is not a DHCP server present.

Typical System Installation

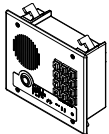

Getting Started

- Download the *Operations Guide* PDF file, from the **Downloads** tab at the following webpage:  
<https://www.cyberdata.net/products/011308>
- Create a plan for the locations of your Intercoms.
- **WARNING:** This product should be installed by a licensed electrician according to all local electrical and building codes.
- **WARNING:** To prevent injury, this apparatus must be securely attached to the floor/wall in accordance with the installation instructions.
- **WARNING:** The PoE connector is intended for intra-building connections only and does not route to the outside plant.
- **WARNING:** This enclosure is not rated for any AC voltages!
