Connecting and Sealing the Intercom

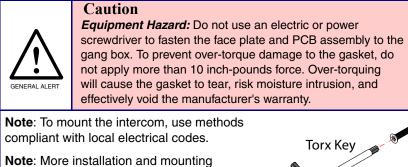

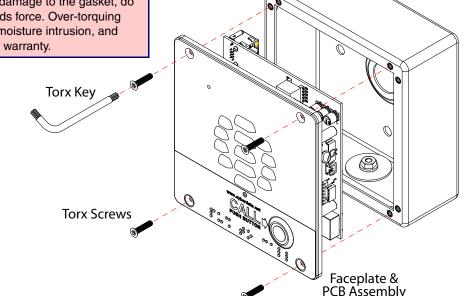

Proper Gang Box Sealing

Properly seal the intercom to prevent the accumulation of dust and moisture. Critical areas are shown in the image above: the conduit hole, all screw holes and an application of sealant around the perimeter.

Installation Quick Reference

Singlewire InformaCast Outdoor Intercom

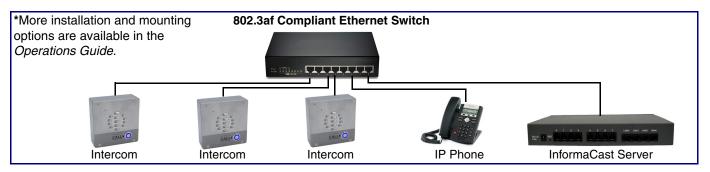

011309

Parameter	Factory Default Setting
IP Addressing	DHCP
P Address ^a	10.10.10.10
Web Access Username	admin
Web Access Password	admin
Subnet Mask ^a	255.0.0.0
Default Gateway ^a	10.0.0.1

a. Default if there is not a DHCP server present.

Typical System Installation

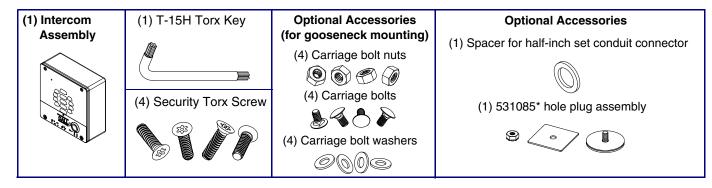

Getting Started

- Download the Operations Guide PDF file, from the **Downloads** tab at the following webpage:
 - https://www.cyberdata.net/products/011309
- · Create a plan for the locations of your Intercoms.
- WARNING: This product should be installed by a licensed electrician according to all local electrical and building codes.
- WARNING: To prevent injury, this apparatus must be securely attached to the floor/wall in accordance with the installation
- WARNING: The PoE connector is intended for intra-building connections only and does not route to the outside plant.
- WARNING: This enclosure is not rated for any AC voltages!
- · WARNING: Failure to properly seal intercom can compromise the IP rating. Should the product be exposed to water damage, it will be treated as an out of warranty scenario due to improper installation.

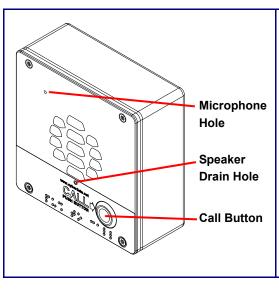

Parts

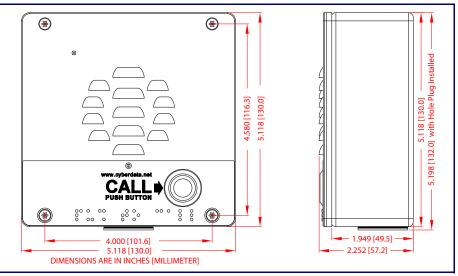

Quick Reference

Features

Dimensions (Front and Side View)

Terminal Block Connections

Alternate Power Input:

- 1 = +8 to +12VDC @ 1000mA Regulated Power Supply*
- 2 = Power Ground*

Relay Contact:

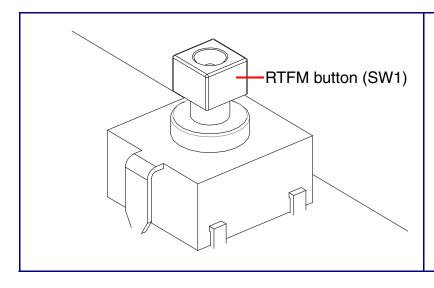

(1 A at 30 VDC for continuous loads)

- 3 = Relay Common
- 4 = Relay Normally Open Contact
- 5 = Sense Input
- 6 = Sense Ground
- 7 = Remote Switch "A"
- 8 = Remote Switch "B"

*Contacts 1 and 2 on the terminal block are only for powering the device from a non-PoE 12VDC power source as an alternative to Network PoE power. Use of these contacts for any other purpose will damage the device and void the product warranty.

Use a 3.17 mm (1/8-inch) flat blade screwdriver for the terminal block screws Wire (IN) Tin Leads Approx. 1/4" or Terminal Block can accept 16 AWG wire

RTFM Button

When the device is operational and linked to a network, you can use the Reset Test Function Management (RTFM) button (SW1 [see picture]) to announce the device's IP address or restore the device to the factory default settings.

To announce the device's current IP address:

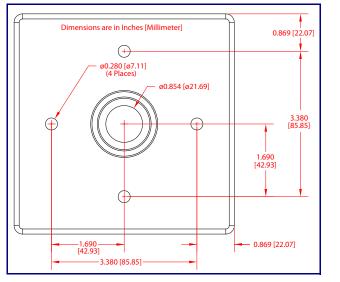

Press and release the RTFM button within a five second window.

The device will use DHCP to obtain the new IP Note address (DHCP-assigned address or default to 10.10.10.10 if a DHCP server is not present).

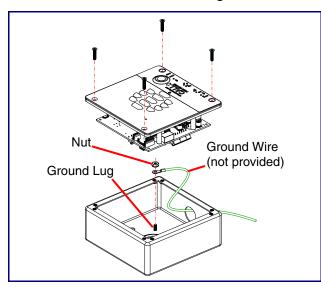

To restore the device to factory default settings:

Press and hold the RTFM button for longer than five seconds until you hear the device announce that it is restoring the factory default settings.
