

Multicast VoIP Microphone

The CyberData Multicast VoIP Microphone is a device that allows the user, while pressing the “Page” button, to broadcast a live or buffered announcements directly to VoIP audio endpoints that support Multicast.

This PoE-powered product is perfect for immediate live paging in schools, retail stores and manufacturing environments. In an echo sensitive environment, the delayed page support allows the user to record a message while the page button is depressed. Once the page button is released, the page will be sent.

Features

- Multicast Transmit
- Compatible with CyberData endpoints that receive multicast
- Page to Multicast-enabled phones
- Delayed page support (up to 60 seconds)
- 12-inch flexible shaft microphone
- Desktop Design
- Wall mountable
- Web-based configuration and firmware upload
- Autoprovision support
