CyberData
The IP Endpoint Company

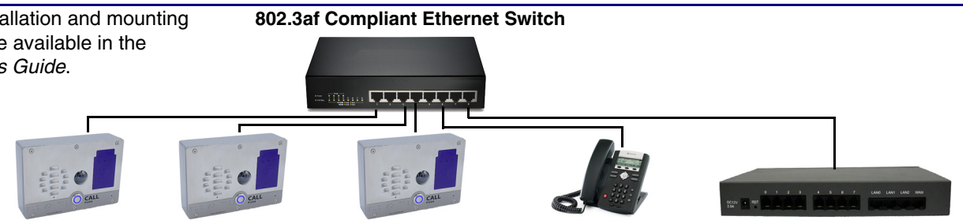
Installation Quick Reference
SIP Outdoor Video Intercom with RFID Secure Access Control Endpoint
011478

Parameter	Factory Default Setting
IP Addressing	DHCP
IP Address[a]	192.168.1.23
Web Access Username	admin
Web Access Password	admin
Subnet Mask[a]	255.255.255.0
Default Gateway[a]	192.168.1.1

a. Default if there is not a DHCP server present.

Typical System Installation

*More installation and mounting options are available in the *Operations Guide*.

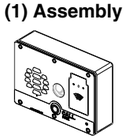


Getting Started

- Download the *Operations Guide* PDF file, from the **Downloads** tab at the following webpage:
  https://www.cyberdata.net/products/011478
- Create a plan for the locations of your devices.
- WARNING: This product should be installed by a licensed electrician according to all local electrical and building codes.
- WARNING: To prevent injury, this apparatus must be securely attached to the floor/wall in accordance with the installation instructions.
- WARNING: The PoE connector is intended for intra-building connections only and does not route to the outside plant.
- WARNING: This enclosure is not rated for any AC voltages!

Parts

(1) Assembly



RFID cards

Accessory Kit

Carriage Bolt Bolts

Carriage Bolt Nuts

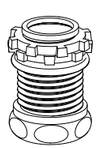
Carriage Bolt Washers

Mounting Component Security Torx Key

Accessory Kit Security Torx MS

Optional Accessories

(1) 1/2-inch EMT compression connector with extra sealing locknut



(1) 531085* Hole plug assembly

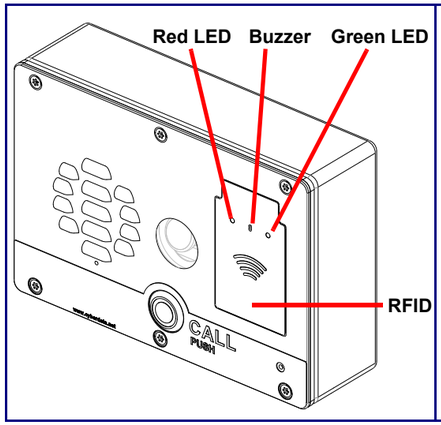
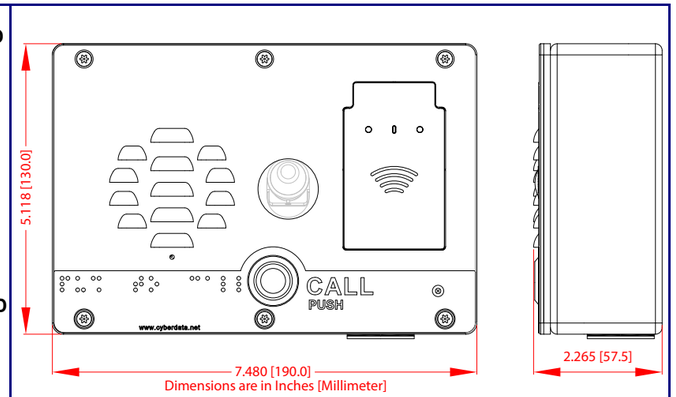
Features

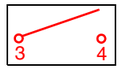


Dimensions (Front and Side View)



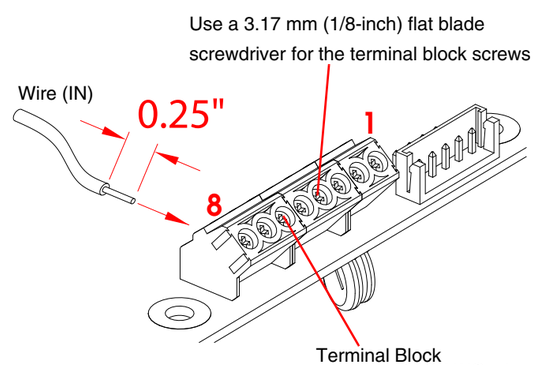
Terminal Block Connections

Alternate Power Input:
1 = +8 to +12VDC @ 1000mA Regulated Power Supply*
2 = Power Ground*

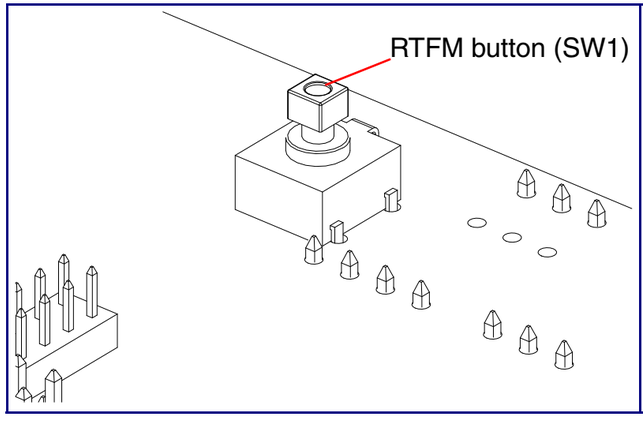


Relay Contact:
(1 A at 30 VDC for continuous loads)
3 = Relay Common
4 = Relay Normally Open Contact
5 = Sense Input
6 = Sense Ground
7 = Remote Switch "A"
8 = Remote Switch "B"

*Contacts 1 and 2 on the terminal block are only for powering the device from a non-PoE 12VDC power source as an alternative to Network PoE power. Use of these contacts for any other purpose will damage the device and void the product warranty.



RTFM Button



When the device is operational and linked to a network, you can use the Reset Test Function Management (RTFM) button (SW1 [see picture]) to restore the device to the factory default settings.

To restore the device to factory default settings:

- Press and hold the RTFM button for longer than five seconds.

Note The device will use DHCP to obtain the new IP address (DHCP-assigned address or default to 10.10.10.10 if a DHCP server is not present).

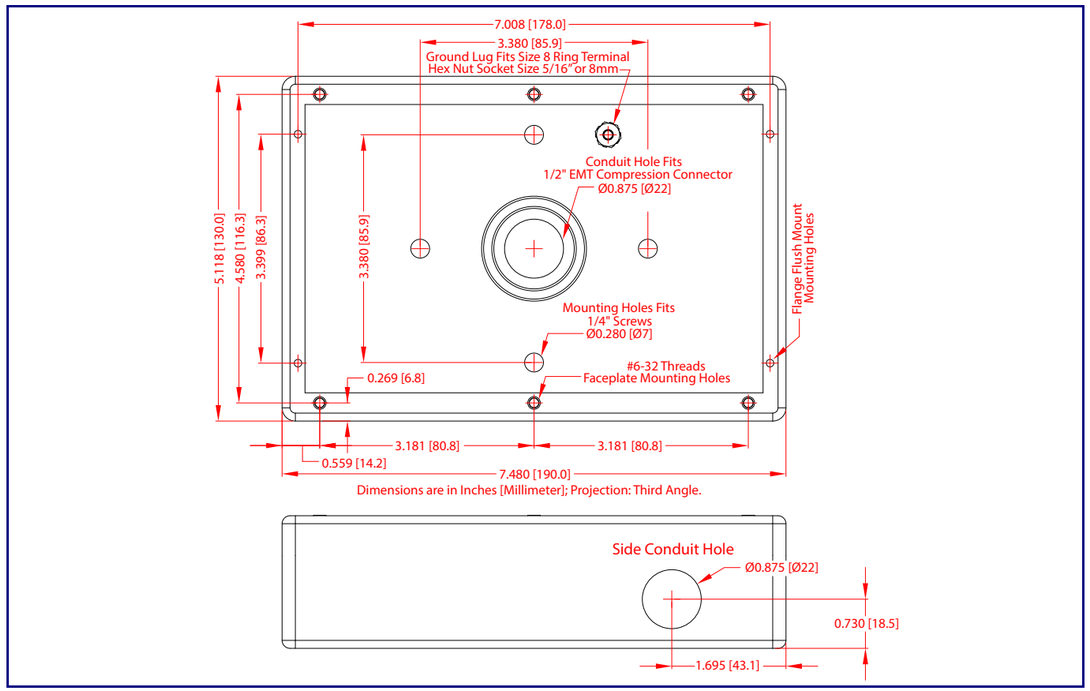
Dimensions (Rear View and Mounting Holes)

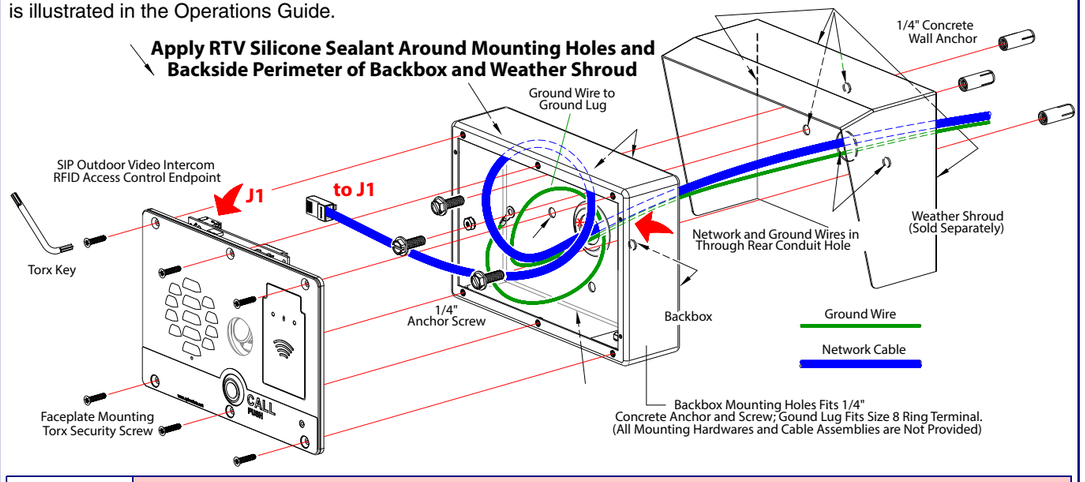


Wall Mounting with Ground Cable and Network Cable Installation

Note: To mount the device, use methods compliant with local electrical codes.

Note: More installation and mounting information is illustrated in the Operations Guide.

Note: For flush mount installations, purchase the 011442 Flush Mount Kit, 2x (sold separately). For more information, go to: https://www.cyberdata.net/products/011442



GENERAL ALERT

Caution

Equipment Hazard: Do not use an electric or power screwdriver to fasten the face plate and PCB assembly to the gang box. To prevent over-torque damage to the gasket, do not apply more than 10 inch-pounds force. Over-torquing will cause the gasket to tear, risk moisture intrusion, and effectively void the manufacturer's warranty.
