This manual and related materials are the copyrighted property of CyberData Corporation. No part of this manual or related materials may be reproduced or transmitted, in any form or by any means (except for internal use by licensed customers), without prior express written permission of CyberData Corporation. This manual, and the products, software, firmware, and/or hardware described in this manual are the property of CyberData Corporation, provided under the terms of an agreement between CyberData Corporation and recipient of this manual, and their use is subject to that agreement and its terms.

**DISCLAIMER:** Except as expressly and specifically stated in a written agreement executed by CyberData Corporation, CyberData Corporation makes no representation or warranty, express or implied, including any warranty or merchantability or fitness for any purpose, with respect to this manual or the products, software, firmware, and/or hardware described herein, and CyberData Corporation assumes no liability for damages or claims resulting from any use of this manual or such products, software, firmware, and/or hardware. CyberData Corporation reserves the right to make changes, without notice, to this manual and to any such product, software, firmware, and/or hardware.

**OPEN SOURCE STATEMENT:** Certain software components included in CyberData products are subject to the GNU General Public License (GPL) and Lesser GNU General Public License (LGPL) “open source” or “free software” licenses. Some of this Open Source Software may be owned by third parties. Open Source Software is not subject to the terms and conditions of the CyberData COPYRIGHT NOTICE or software licenses. Your right to copy, modify, and distribute any Open Source Software is determined by the terms of the GPL, LGPL, or third party, according to who licenses that software.

Software or firmware developed by Cyberdata that is unrelated to Open Source Software is copyrighted by CyberData, subject to the terms of CyberData licenses, and may not be copied, modified, reverse-engineered, or otherwise altered without explicit written permission from CyberData Corporation.

**TRADEMARK NOTICE:** CyberData Corporation and the CyberData Corporation logos are trademarks of CyberData Corporation. Other product names, trademarks, and service marks may be the trademarks or registered trademarks of their respective owners.

Technical Support

The fastest way to get technical support for your VoIP product is to submit a VoIP Technical Support form at the following website:

<https://support.cyberdata.net/>

Phone: (831) 373-2601, Ext. 333

Fax: (831) 373-4193

Company and product information is at [www.cyberdata.net](http://www.cyberdata.net).

---

# Revision Information

Revision 932065B, which corresponds to firmware version 22.0, was released on March 27, 2025, and has the following changes:

- Updates the following text in [Section 2.6, “SIP \(Session Initiation Protocol\)”](#):
  - [This page sets the options for phone calls. Configure up to 3 servers, with 2 acting as backup, and a server for the nightringer. The nightringer is a second sip extension that only rings, never connects to a call. Many customers use the nightringer in a Hunt/Ring Group.](#)
- Adds the following text in [Section 2.7, “Paging Groups \(PGROUPS\)”](#):

[The PGroups page allows for configuration of the PGroup\(s\) including stored message playback and Polycom Paging.](#)
- Adds [Section 2.7.1, “PGroup Configuration”](#)

---

## Pictorial Alert Icons

 <p>GENERAL ALERT</p>	<p><b>General Alert</b></p> <p>This pictorial alert indicates a potentially hazardous situation. This alert will be followed by a hazard level heading and more specific information about the hazard.</p>
	<p><b>Ground</b></p> <p>This pictorial alert indicates the Earth grounding connection point.</p>

---

## Hazard Levels

**Danger:** Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury. This is limited to the most extreme situations.

**Warning:** Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

**Caution:** Indicates a potentially hazardous situation which, if not avoided, could result in minor or moderate injury. It may also alert users against unsafe practices.

**Notice:** Indicates a statement of company policy (that is, a safety policy or protection of property).

The safety guidelines for the equipment in this manual do not purport to address all the safety issues of the equipment. It is the responsibility of the user to establish appropriate safety, ergonomic, and health practices and determine the applicability of regulatory limitations prior to use. Potential safety hazards are identified in this manual through the use of words Danger, Warning, and Caution, the specific hazard type, and pictorial alert icons.

---

# Important Safety Instructions

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
13. Prior to installation, consult local building and electrical code requirements.

 <p>GENERAL ALERT</p>	<p><b>Warning</b> <i>Electrical Hazard:</i> This product should be installed by a licensed electrician according to all local electrical and building codes.</p>
 <p>GENERAL ALERT</p>	<p><b>Warning</b> <i>Electrical Hazard:</i> To prevent injury, this apparatus must be securely attached to the rack, wall or desktop in accordance with the installation instructions.</p>

---

## Abbreviations and Terms

<b>Abbreviation or Term</b>	<b>Definition</b>
A-law	A standard companding algorithm, used in European digital communications systems to optimize, i.e., modify, the dynamic range of an analog signal for digitizing.
AVP	Audio Video Profile
Cat 5	TIA/EIA-568-B Category 5
DHCP	Dynamic Host Configuration Protocol
LAN	Local Area Network
LED	Light Emitting Diode
Mbps	Megabits per second.
NTP	Network Time Protocol
PBX	Private Branch Exchange
PoE	Power over Ethernet (as per IEEE 802.3af standard)
RTFM	Reset Test Function Management
SIP	Session Initiated Protocol
SRTP	Secure Real Time Protocol
u-law	A companding algorithm, primarily used in the digital telecommunication
UC	Unified Communications
VoIP	Voice over Internet Protocol

# 1 Product Overview

## 1.1 General Wire Recommendation for 25V or 70V Speakers

For the majority of installations we recommend the following specifications for the speaker wiring.

### **16/2 (16AWG/2 Conductor) Gray Stranded In-Wall CL3R Speaker Wire (Figure 1-1)**

- Use with speaker systems in an indoor audio system
- Class 3, riser rated for in-wall installation in riser and non-riser spaces
- PVC insulating jacket
- 2 fully annealed class B stranded bare copper conductors
- 16-Gauge
- UL Type CL3R
- Plenum rated

There are many brands that will work, but we have personally tested the Southwire company. The description below are the details on this wire in a 500 foot length.

**P50002 SY 16/2 STR CU OAS CMP/CL3P CMP/CL3P/FPLP FT6 PLENUM SHIELDED STRANDED 185 25.07**

**Note** Different gauge wiring can be used from our standard 16/2 recommendation if specific distances or power levels are trying to be maintained. Feel free to consult with our Design Services Group for additional assistance.

**Figure 1-1. 16/2 (16AWG/2 Conductor) Gray Stranded In-Wall CL3R Speaker Wire**

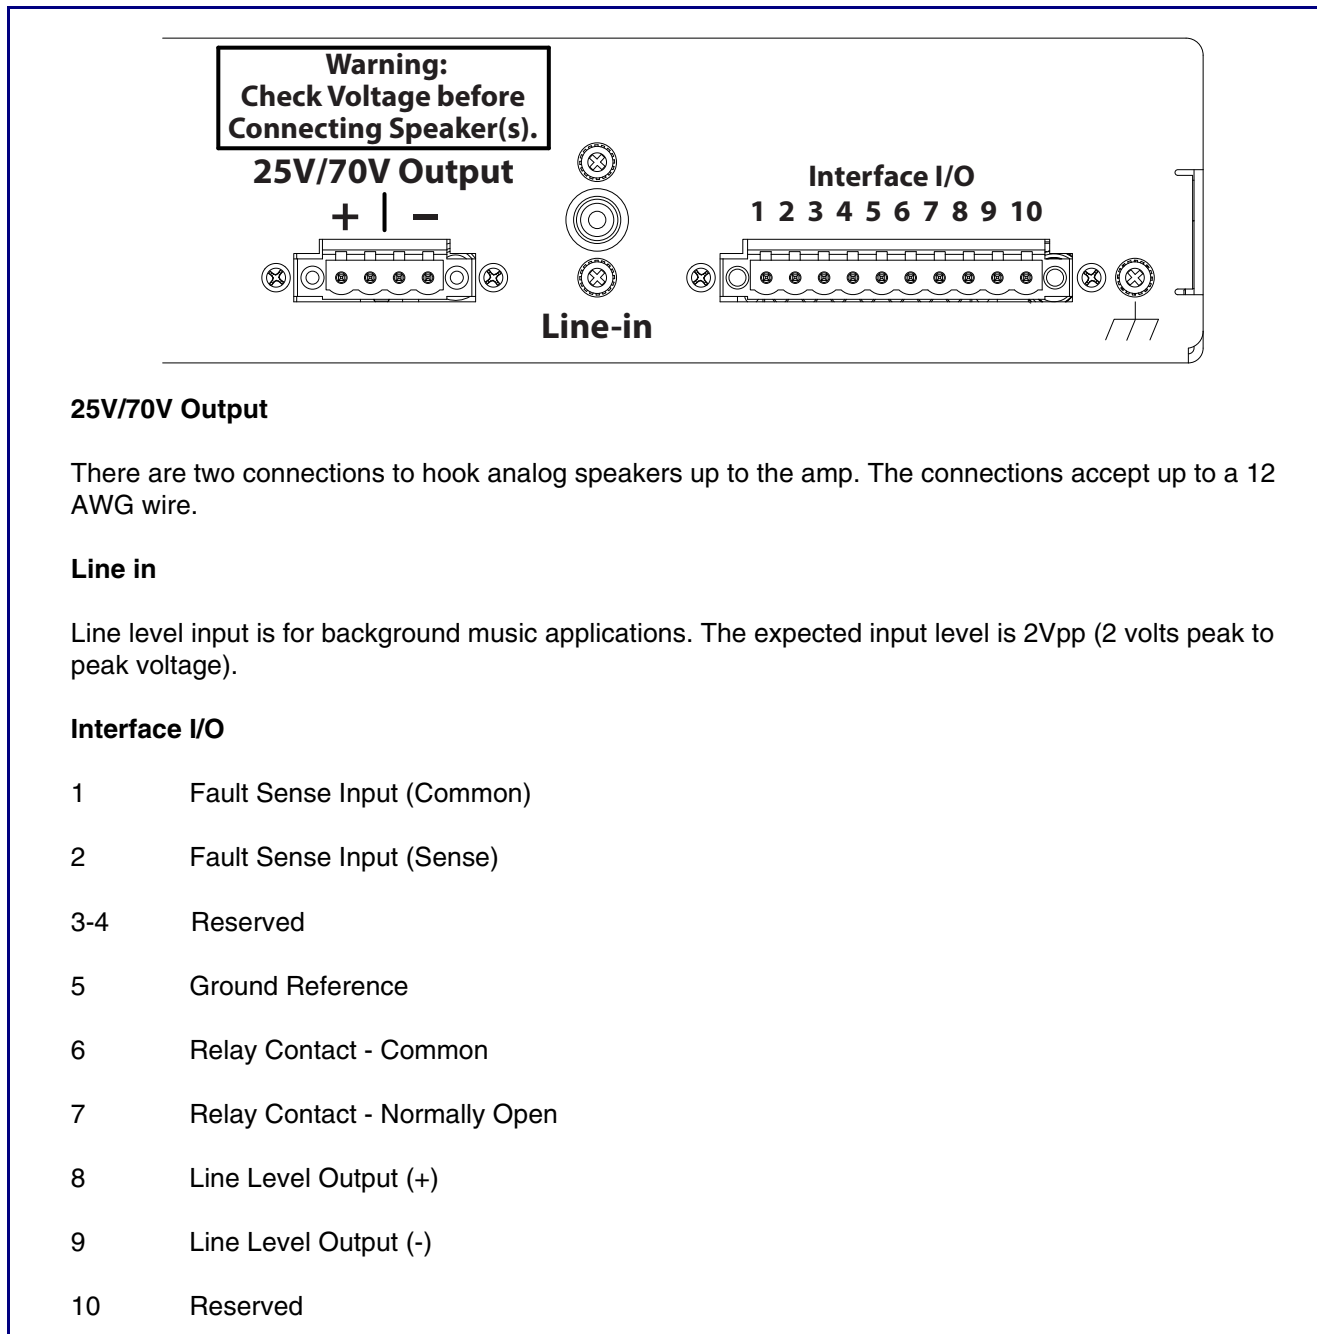

## 1.2 Connecting the Paging 25V/70V Amplifier

Before you connect the Paging 25V/70V Amplifier be sure that you have received all of the parts of the device on the Quick Reference Placemat which comes with the product.

See [Figure 1-2](#) for the connection options that are available for the Paging 25V/70V Amplifier.

**Figure 1-2. Connection Options**

---

## 1.2.1 Ground Connection

This connection allows you to connect the device to an electrical ground.

---

## 1.2.2 Line In

This RCA 10K Ohm Hi-Z input connection allows you to connect an external music player to the internal amplifier.

ESD Sensitivity: This equipment may be sensitive to ESD (electro-static discharge). It may cause the system to become unresponsive in some higher than normal ESD environments. As a precaution, during installation, it is best to make all external connections to the unit before powering on.

## 1.3 Page Port Output Connections

**Table 1-1. Page Port Output Connections**

Pin	Description
Pin 1	Fault Sense Input (Common). See <a href="#">Section 1.3.1, "Pin 1 and 2—Fault Sense Input (Common/Sense)."</a>
Pin 2	Fault Sense Input (Sense). See <a href="#">Section 1.3.1, "Pin 1 and 2—Fault Sense Input (Common/Sense)."</a>
Pin 3	Reserved
Pin 4	Reserved
Pin 5	Ground Reference
Pin 6	Relay Contact - Common <sup>a</sup> . See <a href="#">Section 1.3.2, "Pin 6 and 7—Relay Contact (Common/Normally Open)."</a>
Pin 7	Relay Contact - Normally Open <sup>a</sup> . See <a href="#">Section 1.3.2, "Pin 6 and 7—Relay Contact (Common/Normally Open)."</a>
Pin 8	Line Level Output (+). See <a href="#">Section 1.3.3, "Pin 8 and 9 - Line Out."</a>
Pin 9	Line Level Output (-). See <a href="#">Section 1.3.3, "Pin 8 and 9 - Line Out."</a>
Pin 10	Reserved

a. 1 Amp at 30 VDC for continuous loads

### 1.3.1 Pin 1 and 2—Fault Sense Input (Common/Sense)

This input was designed as a method of monitoring an external amplifier that is equipped with a fault sense relay.

When enabled via the web interface ([Section 2.11, "Fault"](#)), this input (when closed) will play a user uploadable audio file out of the line-out connection and/or place a SIP call to a pre-determined extension and play that file.

### 1.3.2 Pin 6 and 7—Relay Contact (Common/Normally Open)

When enabled on the web interface ([Section 2.3, "Device"](#)), every time an audio file is played out of the local line-out or 600 Ohm output, the relay will close, thereby enabling amplifiers with a remote turn-on capability to become active.

### 1.3.3 Pin 8 and 9 - Line Out

These RCA 10K Ohm Hi-Z output connections allow you to connect the device to The RCA line-in (10K Ohm Hi-Z) of an external audio amplifier.

## 1.4 Connect to the Power Source

To supply power, connect the Paging 25V/70V Amplifier to a standard 100-240VAC 50/60Hz power supply. If required, connect the earth grounding wire to the chassis ground on the back of the unit. See [Figure 1-3](#).

**Figure 1-3. Connecting to the Power Source**

<p><b>Power Supply</b></p>  <p>100-240V AC Power Input</p>	<p>To set up the device, connect the device to your network:</p> <p><b>Power Supply</b></p> <ul style="list-style-type: none"><li>• Connect the Amplifier to a standard 100-240VAC, 50/60Hz external power supply</li></ul> <p><b>Chassis Ground</b></p> <ul style="list-style-type: none"><li>• Connect the earth grounding wire to the Chassis Ground. See the figure on the left.</li></ul>
<p><b>Chassis Ground</b></p>  <p>Chassis ground</p>	

## 1.5 Connect to the Network

Plug one end of a standard Ethernet cable into the device **Ethernet** port. Plug the other end into your network.

**Figure 1-4. Connecting to the Network**

## 1.6 Confirm that the Paging 25V/70V Amplifier is Up and Running

The LEDs on the front of the Paging 25V/70V Amplifier verify the unit's operations.

**Figure 1-5. LEDs**

When you apply power, turn ON the Power switch and connect the Ethernet to a live network:

- The square, **YELLOW Link** LED above the **Ethernet** port indicates that the network connection has been established at 100Mbit speed.
- The square, **GREEN Network Activity** LED above the Ethernet port will blink to indicate network activity.
- The round **GREEN/BLUE Status** LED is **BLUE**, indicating power is **ON**. Once the device is initialized, the LED will blink **GREEN** at one second intervals.
- The round **GREEN Paging** LED comes on after the device is booted and initialized. This LED blinks when a page is in progress. You can disable **Beep on Initialization** on the **Device Configuration** page.

### 1.6.1 Verify Network Activity

The square, **GREEN Network Activity** LED blinks when there is network traffic.

## 1.7 LCD Display Explanation

- The LCD Display can be interacted with via the **Toggle** and **Enter** buttons on the front panel of the device. See [Figure 1-6](#).

Figure 1-6. LCD Display

- The **Toggle** button is used to switch between menu pages and on specific pages to toggle between options.
- The **Enter** button is used on specific pages to confirm a setting.
- LCD Display menu pages:
  - Screen 1: CyberData Splash Screen
  - Screen 2: Serial Number and Mode (25v or 70v)
  - Screen 3: Temperature (Celsius /Fahrenheit) and fan status (on or off)
  - Screen 4: IP Address and MAC Address
  - Screen 5: Firmware Version and Part Number
  - Screen 6: Master Volume Level
  - Screen 7: Test Audio (Shows in Green)

## 1.8 Announcing the IP Address

To announce the IP address for the Paging 25V/70V Amplifier, complete the following steps:

1. Use a paper clip to press the RTFM button, bringing up the RTFM screen. See [Figure 1-7](#).
2. Use the toggle button to select **Speak IP Address** and then **Enter** to activate.
3. If a speaker is connected, the device will announce the IP address.

**Figure 1-7. RTFM Switch**

## 1.9 Restore the Factory Default Settings

The Paging 25V/70V Amplifier is delivered with factory set default values for the parameters in [Table 1-2](#). Use the **RTFM** switch (see [Figure 1-8](#)) on the front of the unit to restore these parameters to the factory default settings.

**Figure 1-8. RTFM Switch**

**Note** When you perform this procedure, the factory default settings are restored. The default parameters for access are shown in [Table 1-2](#).

**Table 1-2. Factory Default Settings**

Parameter	Factory Default Setting
IP Addressing	DHCP
IP Address <sup>a</sup>	192.168.1.23
Web Access Username	admin
Web Access Password	admin
Subnet Mask <sup>a</sup>	255.255.255.0
Default Gateway <sup>a</sup>	192.168.1.1

a. Default if there is not a DHCP server present.

To restore these parameters to the factory default settings:

4. Use a paper clip to press the RTFM button, bringing up the RTFM screen.
5. Use the toggle button to select **Restore Defaults**, and then **Enter** to activate.
6. Selecting **Restore Defaults** will bring up the confirmations screen, where selecting **Enter** will restore defaults.
7. If a speaker is connected, the device will announce, "restoring default configuration" and "rebooting."

# 2 Configure the Device

## 2.1 Log In Page

1. Open your browser to the device IP address.

**Note** If the network does not have access to a DHCP server, the device will default to an IP address of 192.168.1.23.

**Note** Make sure that the PC is on the same IP network as the Paging 25V/70V Amplifier.

**Note** You may also download CyberData's VoIP Discovery Utility program which allows you to easily find and configure the default web address of the CyberData VoIP products.

CyberData's VoIP Discovery Utility program is available at the following website address:

<https://www.cyberdata.net/pages/discovery>

**Note** The Intercom ships in DHCP mode. To get to the **Home** page, use the discovery utility to scan for the device on the network and open your browser from there.

2. On the Log In Page ([Figure 2-1](#)), use the following default **Web Access Username** and **Web Access Password** to access the **Home Page** ([Figure 2-2](#)):

Web Access Username: **admin**

Web Access Password: **admin**

**Figure 2-1. Log In Page**

## 2.2 Home Page

The **Home** page provides device specific information such as Serial Number, Mac Address, and Firmware version. This page is designed as an initial landing page to provide general information on the status of the device.

Figure 2-2. Home Page

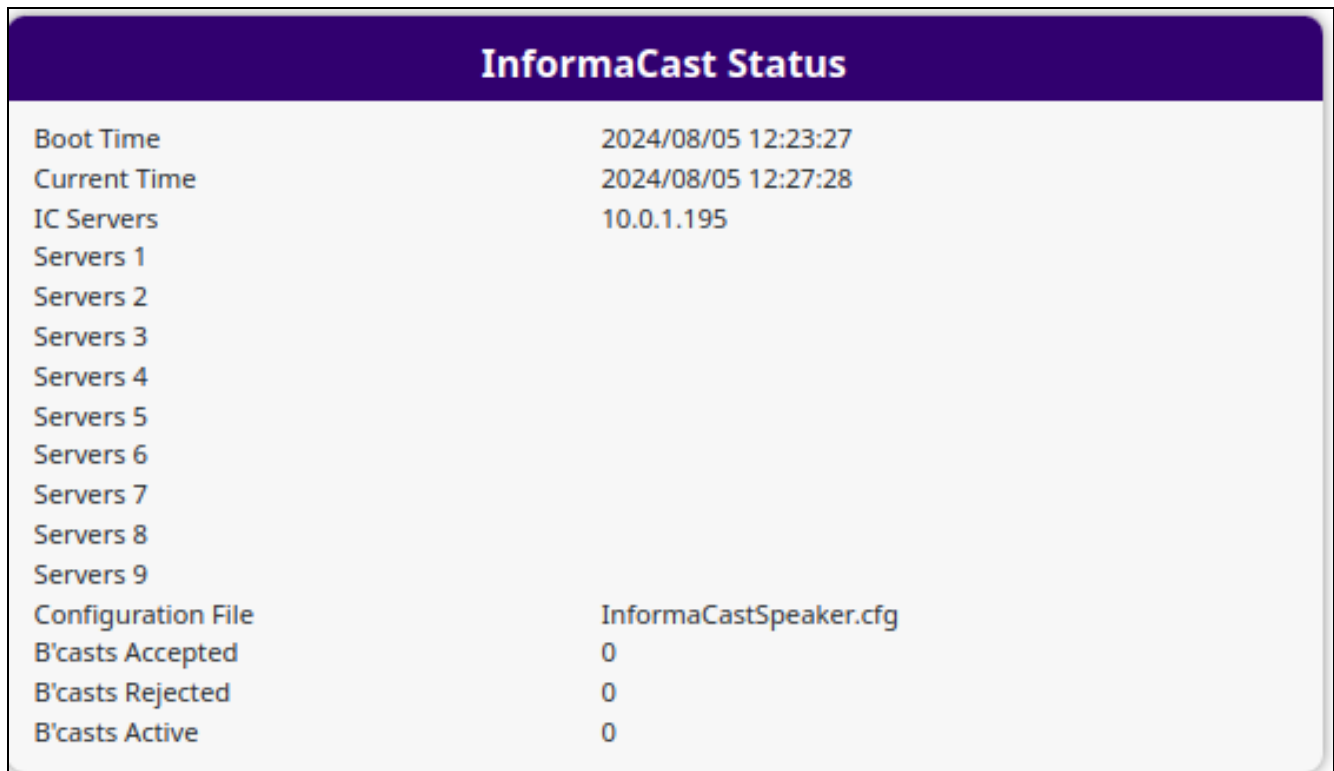

The screenshot displays the CyberData Home Page for a 25/70 Paging Amplifier. The page features a purple header with the CyberData logo and navigation buttons (Test, Save, Cancel, Reboot, Logout). A central navigation sidebar contains icons for various settings. The main content area is divided into five configuration panels:

- Device Configuration:**
  - Serial Number: 579200003
  - Mac Address: 00:20:f7:05:1c:19
  - Firmware Version: v22.0.0
  - Partition 2: v22.0.0
  - Partition 3: v22.0.0
  - Booting Partition: partition 2
- Network Status:**
  - IP Address Protocol: DHCP
  - IP Address: 10.10.1.161
  - Subnet Mask: 255.0.0.0
  - Default Gateway: 10.0.0.1
  - DNS Server 1: 10.0.1.56
  - DNS Server 2:
- SIP Registration:**
  - SIP Mode: **Enabled**
  - Primary Server: **Not registered**
  - Backup Server 1: **Not registered**
  - Backup Server 2: **Not registered**
  - Nightringer Server: **Not registered**
- Audio Configuration:**
  - Master Volume: 8
- System Configuration:**
  - SIP Mode: **Enabled**
  - Multicast Mode: **Disabled**
  - Event Mode: **Disabled**

The footer of the page includes the text "CyberData • Support".

If you are using an InformaCast enabled device, you will see the following:

**Figure 2-3. InformaCast enabled Device**

InformaCast Status	
Boot Time	2024/08/05 12:23:27
Current Time	2024/08/05 12:27:28
IC Servers	10.0.1.195
Servers 1	
Servers 2	
Servers 3	
Servers 4	
Servers 5	
Servers 6	
Servers 7	
Servers 8	
Servers 9	
Configuration File	InformaCastSpeaker.cfg
B'casts Accepted	0
B'casts Rejected	0
B'casts Active	0

## 2.3 Device

The **Device** page allows for adjustment of settings that pertain to the physical device such as relay settings and time zone.

**Figure 2-4. Device Page**

The screenshot displays the CyberData web interface for configuring a 25/70 Paging Amplifier. The top navigation bar shows the product name, serial number (579200003), MAC address (00:20:f7:05:1c:19), available storage (1484MB), and device status (Idle). Action buttons for Test, Save, Cancel, Reboot, and Logout are located in the top right. The main content area is divided into four settings panels:

- Line-in Settings:** Includes options for Line-in to Line-out Loopback (OFF), Line-in to Multicast (OFF), Multicast Address (224.1.2.3), Multicast Port (2000), Detect Line-in Silence (OFF), Multicast Polycom Paging (OFF), Multicast Polycom Channel (1), and Line-in Playback Volume (8). An Advanced Settings button is also present.
- Time Settings:** Shows NTP Server (north-america.pool.ntp.org), NTP Timezone (America/Los\_Angeles (-8)), and Current Time (Thu, 05 Dec 2024 15:23:38).
- Misc Settings:** Includes Device Name (2570 Paging Amplifier), Bypass DTMF Menu (DISABLED), Beep on Init (OFF), and Multicast TTL (255).
- Relay Settings:** Shows Relay on Local Audio (OFF).

A vertical sidebar on the left contains various system icons. The footer includes the CyberData logo and a link to Support.

If you are using an InformaCast enabled device, you will see the following:

**Figure 2-5. InformaCast enabled Device**

The screenshot shows the InformaCast Settings page. The title is "InformaCast Settings". Below the title, there is a field for "InformaCast Server:" with the value "http://10.0.1.195:8081/InformaCast/resources".

## 2.4 Amplifier

Figure 2-6. Amplifier Page

The screenshot displays the CyberData Amplifier Settings interface. At the top, a purple header bar contains the following information: CyberData (The IP Endpoint Company), Product: 25/70 Paging Amplifier, Firmware: v22.0.0, Serial: 57920003, MAC: 00:20:f7:05:1c:19, Available Storage: 1484MB, and Device Status: Idle. On the right side of the header are buttons for Test, Save, Cancel, Reboot, and Logout. A vertical sidebar on the left contains various system icons. The main content area features a central 'Amplifier Settings' dialog box with the following configuration options:

- LCD Enter Button:** ENABLED (dropdown), Master Volume: 8 (input), Voltage Mode: 25V (dropdown). Includes an 'Advanced Settings' button.
- Threshold Temp Action:** DISABLED (dropdown), Audio File: Choose a MSG (dropdown), Times to Play: 1 (input), Place SIP Call: DISABLED (dropdown), Dial Out Extension: 204 (input), Dial Out ID: id204 (input), PGROUP: DISABLED (dropdown). Includes a 'Test' button.
- Protection Mode Action:** DISABLED (dropdown), Audio File: Choose a MSG (dropdown), Times to Play: 1 (input), Place SIP Call: DISABLED (dropdown), Dial Out Extension: 204 (input), Dial Out ID: id204 (input), PGROUP: DISABLED (dropdown). Includes a 'Test' button.
- Recovery Temp Action:** DISABLED (dropdown), Audio File: Choose a MSG (dropdown), Times to Play: 1 (input), Place SIP Call: DISABLED (dropdown), Dial Out Extension: 204 (input), Dial Out ID: id204 (input), PGROUP: DISABLED (dropdown). Includes a 'Test' button.

The footer of the page contains the text 'CyberData • Support'.

## 2.5 Network

The **Network** tab provides access to network-related settings. Assigning the device a static IP address or VLAN is done on this page.

Figure 2-7. Network Page

The screenshot displays the Network configuration page for a CyberData device. The page is divided into three main sections: Network Status, Network Settings, and VLAN Settings. At the top, there is a header bar with the CyberData logo, product information (25/70 Paging Amplifier, Firmware: v22.0.0), serial and MAC addresses (57920003, 00:20:f7:05:1c:19), available storage (1484MB), and device status (Idle). Action buttons for Test, Save, Cancel, Reboot, and Logout are also present.

**Network Status:**

IP Address Protocol	DHCP
IP Address	10.10.1.161
Subnet Mask	255.0.0.0
Default Gateway	10.0.0.1
DNS Server 1	10.0.1.56
DNS Server 2	

**Network Settings:**

Addressing Mode:	DHCP
Hostname:	SipDevice051c19
IP Address:	10.10.10.10
Subnet Mask:	255.0.0.0
Default Gateway:	10.0.0.1
DNS Server 1:	10.0.0.1
DNS Server 2:	10.0.0.1
DHCP Timeout:	60 seconds

**VLAN Settings:**

VLAN ID:	0
VLAN Priority:	0

The footer of the page contains the text "CyberData • Support".

## 2.6 SIP (Session Initiation Protocol)

This page sets the options for phone calls. Configure up to 3 servers, with 2 acting as backup, and a server for the nightringer. The nightringer is a second sip extension that only rings, never connects to a call. Many customers use the nightringer in a Hunt/Ring Group.

Use this page to configure the options for security, transport, codec, and others.

**Note** For specific server configurations, go to the following website address:

<https://www.cyberdata.net/pages/connecting-to-ip-pbx-servers>

Figure 2-8. SIP Page

If you are using an InformaCast enabled device, you will see the following:

Figure 2-9. InformaCast enabled Device

InformaCast SIP Config:	DISABLED
-------------------------	----------

---

## 2.6.1 Dial Out Extension Strings and DTMF Tones (using rfc2833)

Outgoing calls support delayed DTMF (rfc2833) with the first comma pausing 2 seconds and subsequent commas pausing 1 second.

---

## 2.6.2 Point-to-Point Configuration

Dialing point-to-point allows the device to call and a single endpoint. All CyberData endpoints and many phones can use this option. To do this, enable **SIP Operation**, do not enable **SIP Registration**, and use the endpoint's IP address as the Dial Out extension. Delayed DTMF is supported. See [Figure 2-10](#).

**Figure 2-10. SIP Page Set to Point-to-Point Mode**

## 2.7 Paging Groups (PGROUPS)

The **PGroups** page allows for configuration of the PGroup(s) including stored message playback and Polycom Paging.

Figure 2-11. PGROUPS Page

The screenshot displays the CyberData web interface for configuring Paging Groups. At the top, the header includes the CyberData logo, product information (25/70 Paging Amplifier, Firmware: v22.0.0), serial and MAC addresses (57920003, 00:20:F7:05:1c:19), available storage (1484MB), and device status (Idle). Action buttons for Test, Save, Cancel, Reboot, and Logout are present.

The main content area features a 'Stored Message Recording' section with a dropdown menu set to 'DISABLED' and a security code field. Below this is the 'Paging Groups' table, which lists 10 groups with their respective addresses, ports, names, codes, TTLs, and lineout settings. Each row includes an 'Edit' button.

#	Address	Port	Name	Code	TTL	Lineout	
0	234.2.1.1	2000	PagingGroup00		255	Yes	Edit
1	234.2.1.2	2002	PagingGroup01		255	Yes	Edit
2	234.2.1.3	2004	PagingGroup02		255	Yes	Edit
3	234.2.1.4	2006	PagingGroup03		255	Yes	Edit
4	234.2.1.5	2008	PagingGroup04		255	Yes	Edit
5	234.2.1.6	2010	PagingGroup05		255	Yes	Edit

At the bottom of the page, there is a footer with 'CyberData • Support'.

## 2.7.1 PGroup Configuration

To use Polycom Group Paging, configure a multicast group with the IP address and port number of the Polycom phone. The default is 224.0.1.116, port 5001, but can be configured through the phone. Polycom defaults to channels 1, 24, and 25, but can also be configured. The payload should be 20 ms and the codec G711.Mu.

Figure 2-12. PGroup Configuration

<b>Polycom Transmit Channel</b>		<input style="width: 50%;" type="text" value="1 v"/>

## 2.8 SSL

The **SSL** tab allows for the adjustment of certificates used by the device. The certificates used for the web server, SIP Client, and Autoprovisioning can be changed here. It is also possible to add additional CA certificates on this page. CA Certificates allow the device to authenticate servers that it contacts.

Figure 2-13. SSL Page (1 of 2)

The screenshot displays the SSL configuration interface for a CyberData device. At the top, the header includes the CyberData logo, product information (25/70 Paging Amplifier, Firmware: v22.0.0), serial and MAC addresses (579200003, 00:20:f7:05:1c:19), available storage (1484MB), and device status (Idle). Navigation buttons for Test, Save, Cancel, Reboot, and Logout are present.

The main content area is divided into three certificate management panels:

- Web Server Certificate:** Shows certificate details (subject, countryName, stateOrProvinceName, localityName, organizationName, commonName, notBefore, notAfter) and buttons for 'Choose Files', 'Import Web Certificate', and 'Restore Web Certificate'.
- SIP Client Certificate:** Shows similar certificate details and buttons for 'Choose Files', 'Import SIP Certificate', 'Restore SIP Certificate', and a 'Password (optional):' field.
- Autoprovisioning Client Certificate:** Shows certificate details and buttons for 'Choose Files', 'Import Autoprovisioning Certificate', 'Restore Autoprovisioning Certificate', and a 'Password (optional):' field.

Below these panels is the **List of Trusted CAs** section, which includes an 'Upload CA Certificate:' field and an 'Import CA Certificate' button. Below this are buttons for 'Download CyberData CA', 'Generate Cyberdata CSR', 'Remove All', and 'Restore Defaults'. A table lists the installed certificates:

ID	Certificate Name	Info	Remove
1	CyberData_CA.pem	Info	Remove
2	DigiCert_Assured_ID_Root_CA.crt	Info	Remove
3	DigiCert_Assured_ID_Root_G2.crt	Info	Remove
4	DigiCert_Assured_ID_Root_G3.crt	Info	Remove
5	DigiCert_Global_Root_CA.crt	Info	Remove
6	DigiCert_Global_Root_G2.crt	Info	Remove
7	DigiCert_Global_Root_G3.crt	Info	Remove
8	DigiCert_High_Assurance_EV_Root_CA.crt	Info	Remove
9	DigiCert_Trusted_Root_G4.crt	Info	Remove

The footer of the page contains the text 'CyberData • Support'.

Figure 2-14. SSL Page (2 of 2)

The screenshot displays the SSL configuration interface for a CyberData device. At the top, a purple header bar contains the CyberData logo, product information (Product: 25/70 Paging Amplifier, Firmware: v22.0.0), serial and MAC addresses (Serial: 579200003, MAC: 00:20:f7:05:1c:19), available storage (1484MB), and device status (Idle). Action buttons for Test, Save, Cancel, Reboot, and Logout are also present.

The main content area is a table listing 22 certificates, each with an ID, name, and two action buttons: Info and Remove.

ID	Certificate Name	Info	Remove
8	DigiCert_High_Assurance_EV_Root_CA.crt	Info	Remove
9	DigiCert_Trusted_Root_G4.crt	Info	Remove
10	GeoTrust_Global_CA.crt	Info	Remove

28	thawte_Primary_Root_CA_-_G2.crt	Info	Remove
29	thawte_Primary_Root_CA_-_G3.crt	Info	Remove

The bottom of the page features a footer with the CyberData logo and a link to Support.

## 2.9 Multicast

The Multicast page allows the device to join up to ten paging zones that will activate the strobe when a stream is sent to its address.

A paging zone can consist of one or many CyberData multicast group-enabled products. There is no limit to how many endpoints can be in a given paging zone. Each multicast group is defined by a multicast address and port number.

Each multicast group is assigned a priority, allowing simultaneously arriving pages to be serviced based on importance. Multicast groups are compatible with IGMP through version 3. The device supports simultaneous SIP and Multicast.

Figure 2-15. Multicast Page

# 2.10 Schedules

Figure 2-16. Schedules Page

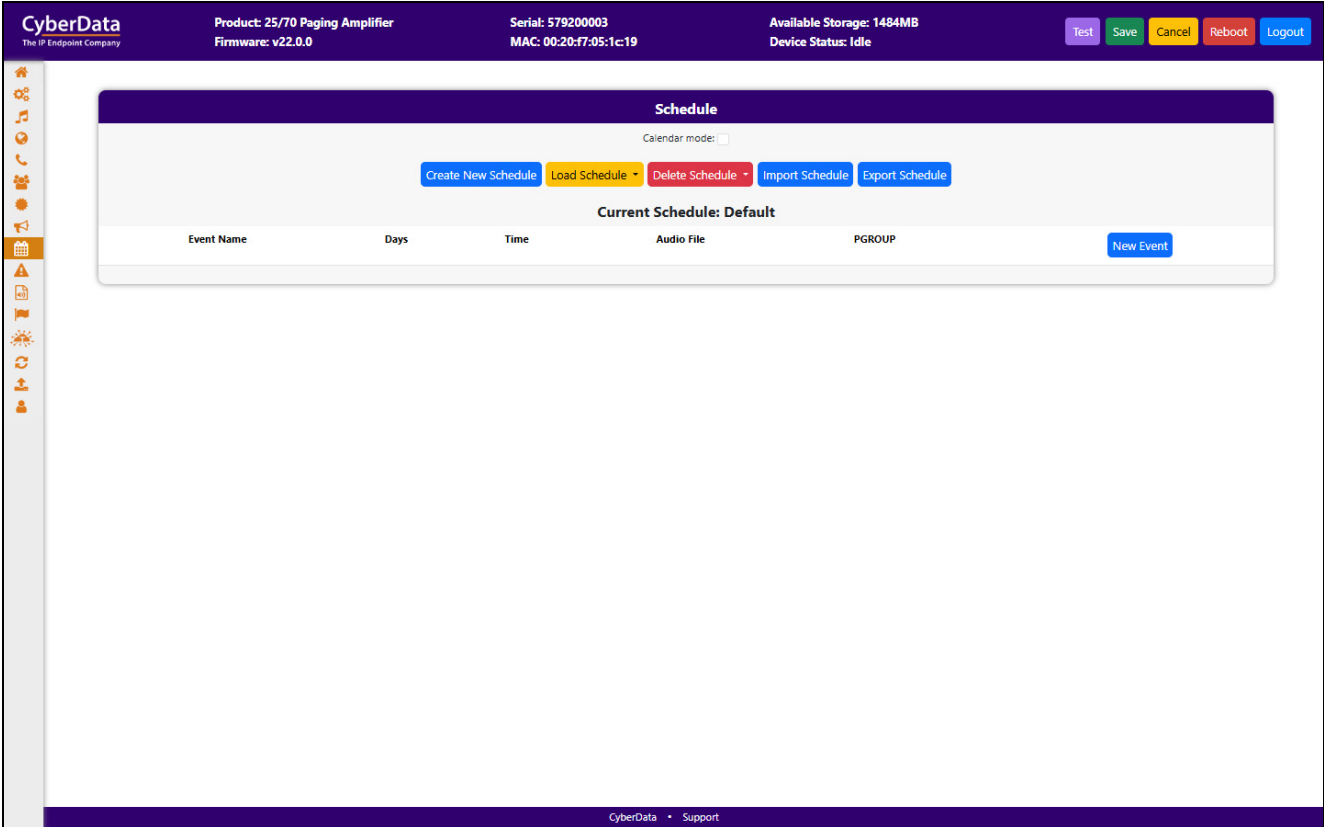

Figure 2-17. Calendar

The screenshot displays the CyberData web interface. At the top, the header contains the CyberData logo, product information (25/70 Paging Amplifier, Firmware: v22.0.0), serial number (579200003), MAC address (00:20:F7:05:1C:19), available storage (1484MB), and device status (Idle). There are also buttons for Test, Save, Cancel, Reboot, and Logout. A sidebar on the left contains various system icons. The main content area is titled "Calendar" and includes a "Calendar mode:" dropdown, buttons for "Create New Calendar", "Load Calendar", "Delete Calendar", "Import Calendar", and "Export Calendar". Below this, it says "Current Calendar: sample" and shows a navigation bar with "New Event", navigation arrows, "December 2024", and "View Past". The calendar grid shows days of the week (SUN to SAT) and dates from 1 to 31. The date 5 is highlighted with a green circle. The bottom of the page has a footer with "CyberData • Support".

## 2.11 Fault

The **Fault** page controls configuration of all Fault or sensor related capabilities of the unit. This can include the fault sensor that is used to have the device take action based on a physical input to the device.

**Figure 2-18. Fault Page**

The screenshot shows the CyberData web interface for a 25/70 Paging Amplifier. The header includes the CyberData logo, product name, serial number, MAC address, available storage, and device status. A sidebar on the left contains navigation icons. The main content area displays the 'Fault Detection Settings' form with the following fields:

Fault Detection Settings	
Message Playbacks:	<input type="text" value="0"/>
Play Message Locally:	<input type="text" value="DISABLED"/>
Call to Extension:	<input type="text" value="DISABLED"/>
Dial Out Extension:	<input type="text" value="204"/>
Dial Out ID:	<input type="text" value="id204"/>
Multicast Audio:	<input type="text" value="DISABLED"/>
Multicast Address:	<input type="text" value="239.168.3.1"/>
Multicast Port:	<input type="text" value="8888"/>
Polycom Paging:	<input type="text" value="DISABLED"/>
Polycom Paging Channel:	<input type="text" value="1"/>

At the bottom of the interface, there are buttons for 'Test', 'Save', 'Cancel', 'Reboot', and 'Logout'. The footer of the page reads 'CyberData • Support'.

## 2.12 Audiofiles

The **Audiofiles** page is used to add custom audio to the board. User uploaded audio will take precedence over the audio files shipped with the device.

Figure 2-19. Audiofiles Page (1 of 3)

The screenshot displays the 'Audio Files' configuration page for a CyberData device. The page header includes the CyberData logo, product information (25/70 Paging Amplifier, Firmware: v22.0.1b4port), serial number (57900071), MAC address (00:20:F7:05:72:04), available storage (1381MB), and device status (Idle). A navigation bar at the top right contains buttons for 'Test', 'Save', 'Cancel', 'Reboot', and 'Logout'. The main content area is a table with the following columns: File Name, Current Settings, Choose File, Play, Save, and Delete. The table lists 20 audio files, all currently set to 'default' and 'No file chosen'. The files are: 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, Audio Test, Dot, Night Ring, Page Tone, Rebooting, Restoring Default, Ringback Tone, Ring Tone, Sensor Triggered, Stored Message File Not Found, Your IP Address Is, Enter Zone, and Confused.

File Name	Currently set to:	Choose File	No file chosen	Play	Save	Delete
0:	default	Choose File	No file chosen	Play	Save	Delete
1:	default	Choose File	No file chosen	Play	Save	Delete

## 2.13 Events

The **Events** page specifies a remote server that can be used to receive HTTP POST events when actions take place on the device.

**Figure 2-22. Events Page**

If you are using an InformaCast enabled device, you will see the following:

**Figure 2-23. InformaCast enabled Device**

---

## 2.13.1 Example Packets for Events

The server and port are used to point to the listening server and the 'Remote Event Server URL' is the destination URL (typically the script running on the remote server that's used to parse and process the POST events).

**Note** The XML is URL-encoded before transmission so the following examples are not completely accurate.

Here are example packets for every event:

```
POST xmlparse_engine HTTP/1.1
Host: 10.0.3.79
User-Agent: CyberData/1.0.0
Content-Length: 197
Content-Type: application/x-www-form-urlencoded
```

```

## 2.14 Terminus

Terminus Cloud Control™ allows users to configure, monitor, and manage notification functions for CyberData's extensive VoIP product line, all from a single, easy-to-use platform. To learn more about Terminus Cloud Control™, go to <https://www.cyberdata.net/pages/terminus>.

The **Terminus** page allows for configuration of settings related to Terminus Cloud Control™.

**Figure 2-24. Terminus Page**

## 2.15 Autoprovisioning

Enabling autoprovisioning allows the device to download provisioning files from a server. It defaults to using DHCP, with options configured in dhcpd.conf on the DHCP server. The file name is <mac address>.xml and if not found, 000000cd.xml.

If a server is named, DHCP is bypassed, and the device will look for a file on the named server.

If a file is named, it will be downloaded instead of <mac address>.xml.

If a server is named, **Use tftp** searches for the file on a tftp server instead of http. If the server is secured (with a password), use **Verify Server Certificate** (username/password) to access it. When using DHCP, these options are configured in dhcpd.conf.

**Autoprov autoupdate**, **Autoprov at time**, and **Autoprov when idle** options are available with either DHCP or a named server.

The template is an xml file with all options set to default values.

**Figure 2-25. Autoprovisioning Page**

The screenshot displays the Autoprovisioning configuration page in the CyberData web interface. At the top, the header includes the CyberData logo, product information (25/70 Paging Amplifier, Firmware: v22.0.0), serial number (57920003), MAC address (00:20:f7:05:1c:19), available storage (1485MB), and device status (Idle). Action buttons for Test, Save, Cancel, Reboot, and Logout are present. The main content area is divided into two panels: 'Autoprov Settings' and 'Autoprov Log'. The 'Autoprov Settings' panel contains various configuration options with dropdown menus and input fields, and a 'Download Template' button. The 'Autoprov Log' panel shows a chronological list of system events related to the autoprovisioning process.

## 2.16 Firmware

**Note** CyberData strongly recommends that you do not upgrade the firmware when the device is likely to be in use.

To upgrade the firmware of your device:

1. Download the latest firmware from the following CyberData web site, and locate your device:

<https://www.cyberdata.net/collections/sip>

2. Unzip the firmware version file. This file may contain the following:

- Firmware file
- Release notes
- Autoprovisioning template

 GENERAL ALERT	<p><b>Caution</b></p> <p><b>Equipment Hazard:</b> Do not reboot the device. It will reboot automatically when the process is complete.</p>
--	--

Figure 2-26. Firmware Page

The screenshot displays the CyberData web interface for a 25/70 Paging Amplifier. The top navigation bar includes the CyberData logo and the following information: Product: 25/70 Paging Amplifier, Firmware: v22.0.0, Serial: 57920003, MAC: 00:20:f7:05:1c:19, Available Storage: 1485MB, and Device Status: Idle. Action buttons for Test, Save, Cancel, Reboot, and Logout are visible on the right. The main content area is titled 'Firmware Settings' and shows the current firmware version as v22.0.0. Below this is a 'Choose File' button with the text 'No file chosen'. The interface also features sections for 'Upload Progress', 'Upload Post Processing', and 'Status Messages', which currently displays 'Socket connected'. A vertical sidebar on the left contains various navigation icons, and the footer includes 'CyberData • Support'.

## 2.17 Admin

The administrator uses the Users List to create new accounts, assigning user names and passwords, and granting access to specific web pages.

Figure 2-27. Admin Page

The screenshot displays the CyberData Admin Page for a 25/70 Paging Amplifier. The interface includes a top navigation bar with the CyberData logo and device information: Product: 25/70 Paging Amplifier, Firmware: v22.0.0, Serial: 57920003, MAC: 00:20:f7:05:1c:19, Available Storage: 1485MB, and Device Status: Idle. Action buttons for Test, Save, Cancel, Reboot, and Logout are present.

The main content area is divided into several sections:

- Admin Settings:** Fields for Username (admin), Password (masked), and Confirm Password (masked).
- Logging Settings:** Debug Level (4) and Log Network Traffic (OFF). Buttons for Get Application Log, Remove Application Log, Get Network Log, Remove Network Log, Get All Logs, and Remove All Logs.
- Configuration Settings:** Partition information (Partition 2: v22.0.0, Partition 3: v22.0.0, Booting Partition: partition 2). Buttons for Restore Default Config, Restore Default Certificates, Import Config, Export Config, and Boot From Other Partition.
- Statistics:** Storage (1485MB), Boot Count (1153), Reboot Count (214), and Uptime (up 11 minutes).
- Users List:** Buttons for Add New User, Delete All Users, Import Users, and Export Users. A table with columns: Username, Home, Device, Network, SIP, PGROUPS, SSL, Multicast, Schedule, Fault, Audiofiles, Events, Autoprov, Firmware, Admin, Amplifier, Terminus.
- Log Viewer:** Service dropdown (Application), Entries to get (250), Sort dropdown (Oldest), and View Log button.

The footer contains the text "CyberData • Support".

## 2.18 Command Interface

Some functions on the device can be activated using simple POST commands to the web interface. The examples in [Table 2-1](#) use the free unix utility, **wget commands**. However, any program that can send HTTP POST commands to the device should work.

### 2.18.1 Command Interface Post Commands

The commands in [Table 2-1](#) require an authenticated session (a valid username and password to work).

**Table 2-1. Command Interface Post Commands**

Device Action	Post Command <sup>a</sup>
Reboot	<code>wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.247/command" --post-data "request=reboot"</code>
Place call to extension (example: extension 600)	<code>wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.247/command" --post-data "request=call&amp;extension=600"</code>
Terminate a call	<code>wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.247/command" --post-data "request=terminate"</code>
Test Relay	<code>wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.247/command" --post-data "request=test_relay"</code>
Activate Relay	<code>wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.247/command" --post-data "request=activate_relay"</code>
Deactivate Relay	<code>wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.247/command" --post-data "request=deactivate_relay"</code>
Speak IP Address	<code>wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.247/command" --post-data "request=speak_ip_address"</code>
Test Audio	<code>wget --user admin --password admin --auth-no-challenge --quiet -O /dev/null --no-check-certificate "https://10.10.1.247/command" --post-data "request=test_audio"</code>
Swap Boot partitions	<code>wget --user admin --password admin --auth-no-challenge --no-check-certificate --quiet -O /dev/null "https://10.10.1.81/command" --post-data "request=swap_boot_partition"</code>

a. Type and enter all of each Post command on one line.

# Appendix A: Troubleshooting/Technical Support

---

## A.1 Contact Information

Contact            CyberData Corporation  
3 Justin Court  
Monterey, CA 93940 USA  
[www.CyberData.net](http://www.CyberData.net)  
Phone: 831-373-2601  
Fax: 831-373-4193

Sales                Sales 831-373-2601, Extension 334

Technical Support    The fastest way to get technical support for your VoIP product is to submit a VoIP Technical Support form at the following website:

<https://support.cyberdata.net/>

The Support Form initiates a ticket which CyberData uses for tracking customer requests. Most importantly, the Support Form tells us which PBX system and software version that you are using, the make and model of the switch, and other important information. This information is essential for troubleshooting. Please also include as much detail as possible in the **Comments** section of the Support Form.

Phone: (831) 373-2601, Extension 333
