

# VoIP Networking Is Easy With CyberData

Expanding a single network drop into two separate connections is easy with CyberData's networking devices. This can be helpful for adding a VoIP phone to a cubical or workspace with a PC connected to a single network drop.

## Expand a network drop into two separate connections!

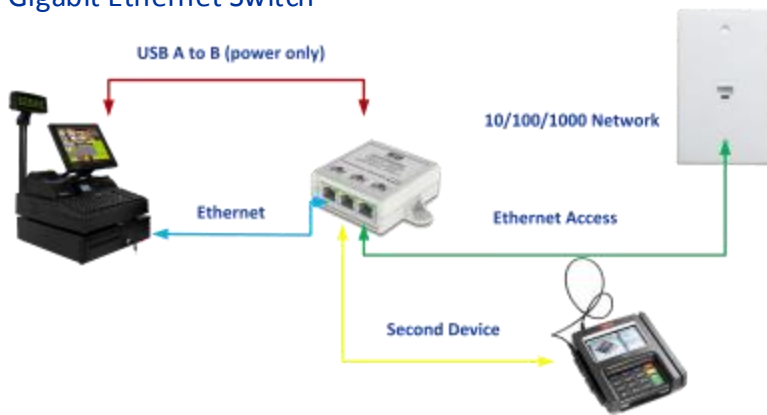

3-Port PoE Powered Switch

**011187 3-Port PoE Powered Switch**  
No separate power supply needed!

## PC users can split a single Gigabit Ethernet port into two Gigabit Ethernet ports

3-Port Gigabit Ethernet Switch

**011236 3-Port Gigabit Ethernet Switch**  
Gets power from your PC's USB Port!

## Monitor network traffic for diagnostic purposes

3-Port USB Gigabit Port Mirroring Switch

**011259 3-Port USB Gigabit Port Mirroring Switch**

Perfect for engineers, programmers and field service personnel

## Monitor for diagnostics purposes while maintaining a PoE connection to attached device

2-Port PoE Gigabit Port Mirroring Switch

**011258 2-Port PoE Gigabit Port Mirroring Switch**
