

CyberData Certifies Interoperability with Zoom, Giving Zoom Phone Clients More Options When it Comes To Paging And Mass Notification

Benefits of Using Zoom Phone with CyberData

- Unlike some other carriers, Zoom does not charge for seat licenses for two-way audio
- Designed with security in mind: TLS 1.2 and SRTP
- Specifically designed for businesses that are looking to add the features of a VoIP phone system
- Easy to set-up, use and manage

Give visitors or delivery personnel a way to notify on-site staff of their presence

Designed with security in mind, Zoom's Cloud Phone system includes traditional PBX features that enable employees to talk and interact in new and dynamic ways.

Wall or ceiling mounted speakers for offices, classrooms

Call Button for Emergency Notification

Alert Ringing in Small Offices
