CyberData Introduces Certification for Resellers and Installers

Monterey, CA - CyberData is actively seeking out the best and brightest in their field to become a part of the CyberData family of Certified Partners. We want to identify, train and certify Resellers and Installers/Integrators who will work closely with end user customers to provide consultation and procure, and/or go onsite and install our paging equipment at a customer's location(s). Customers may have purchased CyberData products from your organization or from some other location.

During the pandemic, CyberData has seen increased activity within traditional and new markets. These new customers need help with procurement and installation, and that's where Resellers and Installers come in.

Upon completion of certification, certified partners can expect:

- Placement of company logo and a hyperlink to company website from CyberData website
- Leads for customers needing assistance in the coverage area
- Advanced notice, demo and training of new devices*
- Access to a Loaner/Demo package of 3 of our most popular devices
- Access to Sharefile folder with hi-res pictures, marketing collateral, news, diagrams, and more
- A Certificate badge you can place on your website noting you are a Certified Installer or Certified Reseller
- **CyberData devices are TAA Compliant.** The Trade Agreement Act (TAA) (19 U.S.C. & 2501-2581) was created in 1979 and is intended to foster the growth and maintenance of a fair and open trading system. TAA compliance requires that the U.S. Government (including GSA) acquires only U.S. - made or certain "designated country" end products.

If you are a Reseller or Installer/Integrator, we want to talk to you!

To take the Certified Reseller/Certified Installer Assessment, please click on the link below to access and download, or email sales@cyberdata.net and we'll send it to you.
