

## **CyberData Corporation Releases New Line Of Secure VoIP Phone Cases**

Monterey, CA - CyberData Corporation, The IP Endpoint Company today announced the release of their new line of Secure VoIP Phone Cases geared specifically to law enforcement, correctional departments and local, county and state court systems.

CyberData's DX70 Secure VoIP Phone Case and DX80 Secure VoIP Phone Case take a Cisco DX70 or Cisco DX80 and enclose it in secure steel enclosure. The Secure VoIP case has a stainless steel front cover and replaceable polycarbonate screen cover. The handset and cord cable are designed for demanding environments such as prisons.

Both Secure VoIP Phone Cases have additional option for a hardened 16-key keypad.

"This market is big and active and there is a trend right now for many courts and correctional facilities to incorporate Video conferencing. This is a demanding environment and needs a higher level of security than a standard video phone can offer. The CyberData Secure phone case for the Cisco DX70 and DX80 enable the Cisco sales team and resellers to provide a solution into the justice system", said Phil Lembo, President and CEO of CyberData.

These are the first releases for 2017 in what CyberData promises to be a very busy year for new releases.
