CyberData
The IP Endpoint Company

SkySwitch

December 12, 2019

Monterey, CA –SkySwitch, the white label platform for resellers of Hosted PBX, Hosted UCaaS, and Hosted Web and Video Conferencing, has certified compatibility with CyberData's SIP-enabled Paging, Notification & Secure Access Control endpoints.

With this news, SkySwitch resellers will have access to additional options for selling SIP endpoints to customers such as SMB, schools & universities, manufacturing and more. CyberData's SIP-enabled endpoints will now be available on the SkySwitch store, and provide resellers with a wide array of options when it comes to SIP paging and notification devices, intercoms, loud ringers, and access control devices.

"With CyberData as a part of the SkySwitch ecosystem, our resellers can meet the growing needs of their customers and deliver powerful, and very cost-effective paging systems," said VP of Sales, Jayson Jones. "Rough weather and challenging conditions and environments, like construction sites or schools, require important announcements to be delivered quickly, and with reliability. This is what CyberData specializes in, and why we're thrilled to have them as a supplier to our resellers. With CyberData's direct support to our reseller channel from the installation phase to deployment, their best practices and configuration approach provides SkySwitch resellers with access to one of the top suppliers of IP Paging that works in some of the most challenging SMB environments."

CyberData's President & CEO Phil Lembo echoes Mr Jones' sentiments, adding, "We're thrilled to be able to offer SkySwitch's resellers a wide array of SIP-enabled endpoints for a host of environments. Developing devices that deliver critical communication to employees and customers is what we do, and we're excited to be working closely with SkySwitch to provide these offerings to their resellers and ultimately, their customers."

CyberData's SIP-enabled devices carry a Two-Year Warranty and CyberData offers LIVE Domestic Tech Support during our business hours. Technical Support for orders from the SkySwitch store will be managed by CyberData. FREE Design Services will also be offered to all SkySwitch resellers.
