

Connecting a CyberData SIP Paging Adapter to a Bogen PCM2000 Zone Paging System

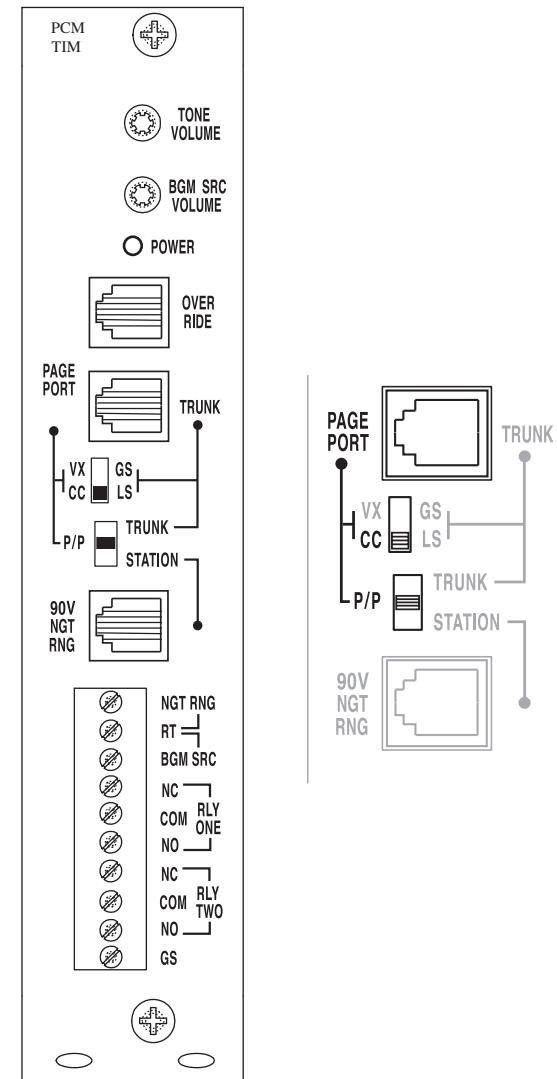

Which version of the Bogen PCMTIM do I have?

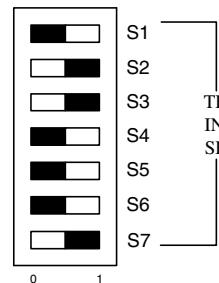

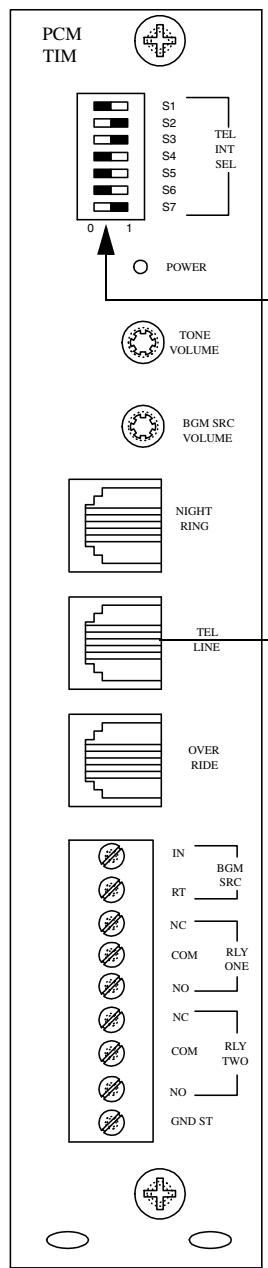

Old PCMTIM (Use pages 3 and 4)

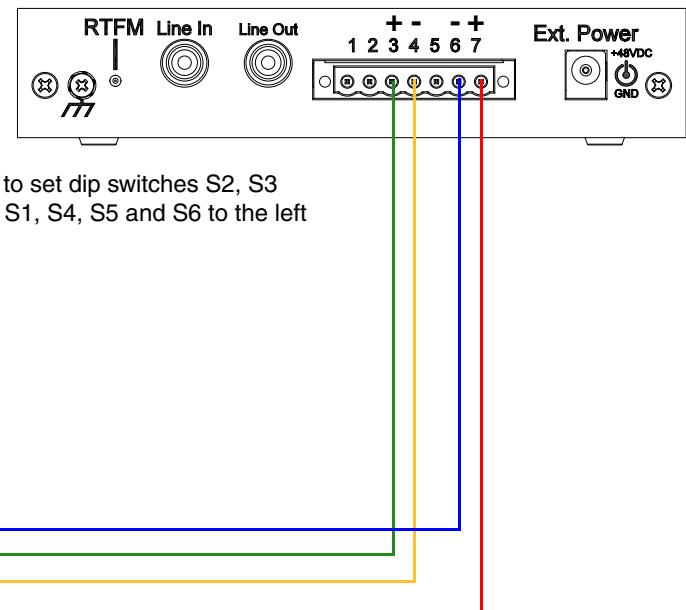

New PCMTIM (Use pages 5 and 6)

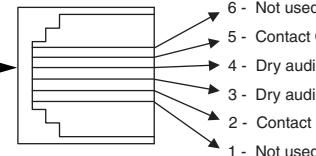

Bogen PCM2000 Application Configuration

SIP Paging Adapter Connections

TEL LINE

Notes

Before connecting your CyberData product, **power off PCM2000 system**. Set the dip switch settings per the above diagram (S2, S3 and S7 to the right)

When using contact closure, enable **Activate Relay on Local Audio** on the Device tab of the Paging Adapter's web interface. Click Save and Reboot for the change to take effect.

When using a Bogen ZPM Module for single analog Page ALL scenario, enable Send pre-configured DTMF for Analog Zone on the Paging Adapter's Device tab then use the Zone field to place the analog zone number. Click Save and Reboot for the change to take effect. End result -> dial Paging Adapter's extension then the device will automatically choose your single Page ALL zone.

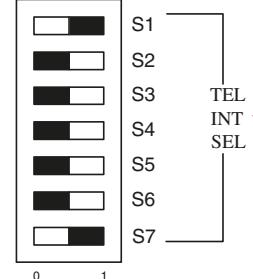

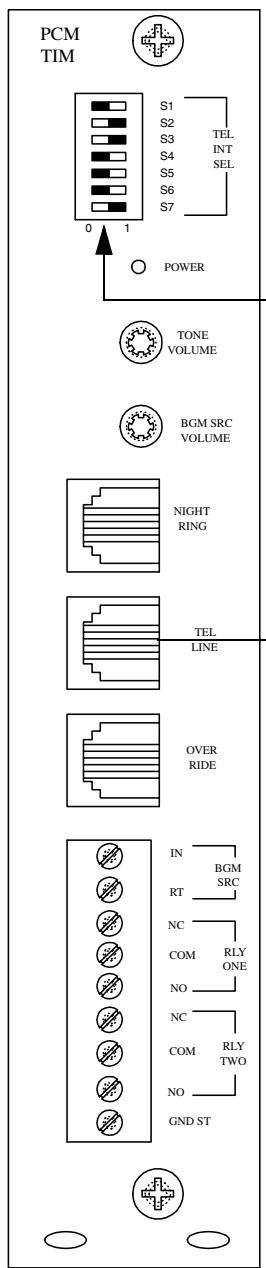

When using a Bogen ZPM Module for analog multi-zone scenario, enable Manual DTMF Entry for Analog Zone on the Paging Adapter's Device tab. Click Save and Reboot for the change to take effect. End result -> dial Paging Adapter's extension, a menu will prompt for the analog zone number followed by #.

Page Port Output Connections

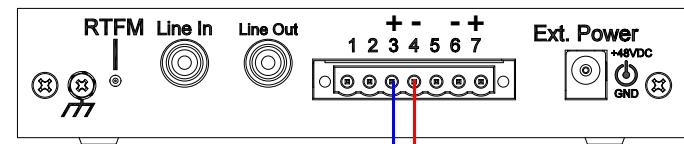

Pin	Description
1	Fault Sense Input (Common).
2	Fault Sense Input (Sense).
3	Positive 600-Ohm Audio Output ^a
4	Negative 600-Ohm Audio Output ^a
5	Audio Ground Reference.
6	Relay Contact - Common ^b
7	Relay Contact - Normally Open ^b

a. The 600-Ohm audio output of the page port is also suited for interfaces with lower input impedances.
b. 1 Amp at 30 VDC for continuous loads.

Notes

Before connecting your CyberData product, **power off PCM2000 system**. Set the dip switch settings per the above diagram (S1 and S7 to the right)

Do not connect the PCMPS2 power supply to the PCMCPU until the module switch settings and wiring connections have been completed

When using a Bogen ZPM Module for single analog Page ALL scenario, enable Send pre-configured DTMF for Analog Zone on the Paging Adapter's Device tab then use the Zone field to place the analog zone number. Click Save and Reboot for the change to take effect. End result -> dial Paging Adapter's extension then the device will automatically choose your single Page ALL zone.

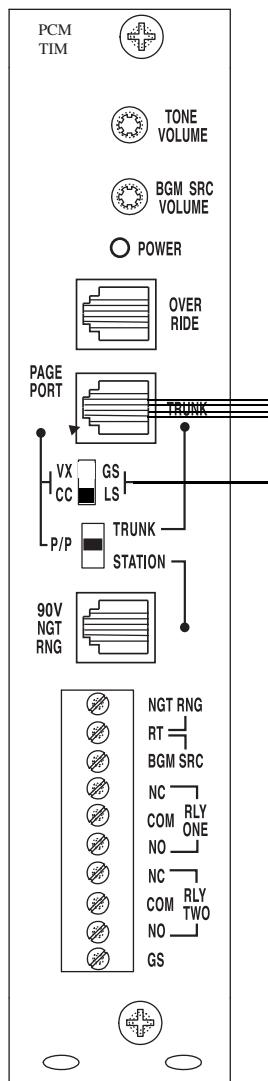

When using a Bogen ZPM Module for analog multi-zone scenario, enable Manual DTMF Entry for Analog Zone on the Paging Adapter's Device tab. Click Save and Reboot for the change to take effect. End result -> dial Paging Adapter's extension, a menu will prompt for the analog zone number followed by #.
