

Peavey CS 800 Amplifier

V3 Zone Controller Connections

Notes

The CyberData V3 Zone Controller's RCA Line Out can connect to one Channel A input on the Peavey CS 800 Amplifier using a phono cable with male plugs.

Link the unused Channel A input to a Channel B input using a phone cable with male plugs per the Peavey CS 800 Amplifier diagram on the left. Set the DDT and Mode switches according to the diagram.
